**QUESTION 1**

Upon issuing IPCONFIG, an IP address of 169.254.0.4 is returned for a Windows client. The IP address is NOT a valid address in the DHCP server's scope. What is the cause of this problem?

- A. The client could not reach the DHCP server and obtained the default addressing from a domain controller
- B. The gateway router detected the DHCP server was attempting to provide an IP address outside the client's subnet and provided the default client address instead
- C. The PC was unable to reach a DHCP server and "auto-configuration" was enabled on the client
- D. The primary DHCP server was unavailable and the address was received from the secondary DHCP server

Correct Answer: C

---

**QUESTION 2**

Which application provides a framework that allows Celerra-specific snap-in management tools to operate?

- A. Celerra Manager
- B. Celerra Monitor
- C. EMC ControlCenter
- D. Microsoft Management Console

Correct Answer: D

---

**QUESTION 3**

Which forms of Windows domain authentication are supported by Celerra?

- A. ACF2 and Kerberos
- B. Internet Key Exchange and NTLM
- C. NTLM and Kerberos
- D. NTLM and Microsoft Point-to-Point Encryption

Correct Answer: C

---

**QUESTION 4**

Which improvement is made when converting an NS gateway system direct-connect to a fabric-connect?

- A. Data Mover availability

- B. Logical storage path availability
- C. Physical storage path availability
- D. Storage processor availability

Correct Answer: B

---

#### QUESTION 5

A customer is setting up a CIFS environment and has decided to run usermapper. Where is the default service located?

- A. Runs in a Virtual Data Mover environment
- B. Runs on a Control Station
- C. Runs on a Data Mover
- D. Runs on an external server

Correct Answer: C

---

#### QUESTION 6

When installing a Celerra at a customer site, which physical connections must be made to each Data Mover for it to be able to share files?

- A. Back-end storage and TLU
- B. Host and back-end storage
- C. Network and back-end storage
- D. Network and TLU

Correct Answer: C

---

#### QUESTION 7

You are attempting to join a Celerra CIFS server to a Windows domain. You receive an error: "Failed to complete command". You are able to ping the DNS server and the domain controller from the Data Mover with no problem. What will need verification?

- A. that the DNS record for the Data Mover is correct
- B. that the DNS SOA record for the host is correct
- C. that the date and time are set correctly
- D. that the share is exported

Correct Answer: C

---

**QUESTION 8**

Which backup methodology is responsible for the transfer of both data and metadata to the backup server through the IP network?

- A. LAN copy
- B. NDMP two-way
- C. MPFS
- D. NDMP three-way

Correct Answer: A

---

**QUESTION 9**

A customer has a fully populated NS704G. Three servers will be loaded as primary servers with the fourth in standby mode. One of the primary servers (server\_2) will provide access to mission-critical data. The other two servers (server\_3 and server\_4) will share out archived data for backup purposes.

In case of Data Mover failure, which standby policies can be invoked on server\_2, server\_3, and server\_4 to ensure that mission-critical data receives priority status?

- A. Auto on server\_2, retry on server\_3 and server\_4
- B. Manual on server\_2, retry on server\_3 and server\_4
- C. Override on server\_2, manual on server\_3 and server\_4
- D. Priority on server\_2, manual on server\_3 and server\_4

Correct Answer: A

---

**QUESTION 10**

Where would you define settings and options to enable each Data Mover to utilize virus checking?

- A. Celerra Management Snap-in
- B. Data Mover param file
- C. Third-party AV engine
- D. VC. client

Correct Answer: A

---

**QUESTION 11**

What is an environmental requirement for a simplified install on a single Data Mover NS system with a fabric-attached CLARiiON back-end?

- A. Enable Access Logix, enable write cache, and ensure four unused SP ports are available
- B. Enable Access Logix, enable write cache, and ensure two unused SP ports are available
- C. Enable Access Logix, enable write cache, and have a parallel connection between the Data Mover and the Control Station
- D. Enable Access Logix, enable write cache, and have at least one uncommitted zone

Correct Answer: B

---

**QUESTION 12**

What is a feature of remote replication using Celerra Replicator?

- A. Bi-directional
- B. Failover
- C. Multi-path
- D. One-to-many

Correct Answer: B

---

**QUESTION 13**

Which solution offers customers with data targeted TLUs a backup infrastructure where only commands pass over the corporate network?

- A. Backup using NDMP
- B. Backup using server\_archive
- C. Network backup from a CIFS client
- D. Network backup from an NFS client

Correct Answer: A

---

**QUESTION 14**

During a Celerra Replicator V2 implementation, the site administrator decides to change the IP addresses of the Data Mover interconnect.

What should be done to the running replication session to change the interfaces?

- A. Stop the session, add the new addresses to the Data Mover interconnect, and delete the old addresses.
- B. Delete the session and add the new addresses to the Data Mover interconnect, and delete the old addresses.
- C. Stop the session and create IP address aliases for the interconnect ports.
- D. Delete the session and create IP address aliases for the interconnect ports.

Correct Answer: A

---

#### QUESTION 15

A customer sets a 50 GB. user quota on a file system. The customer also established a 100 GB. tree quota within that file system. How are users impacted?

- A. If the lower quota setting is reached, the higher one takes effect
- B. The file system quota counts against the tree quota
- C. The tree quota counts against the file system quota
- D. The two quotas are applied independently of each other

Correct Answer: D
