- ⚙️ **800,000+** Satisfied Customers

**QUESTION 1**

What are two profile access mapping options that are new in CUA 4.0?

- A. Auditarchive, tracking
- B. Backups/restores, default
- C. Default, tracking
- D. Monitor, backups/restores

Correct Answer: B

---

**QUESTION 2**

A customer's application uses the SDK to communicate to EMC Centera. A system environmental variable is recommended to point the application to the appropriate PEA file to use.

What is the system environmental variable name?

- A. APPLICATION\_CONFIGURATION\_PEA
- B. CENTERA\_API\_PEA
- C. CENTERA\_PEA\_FILE
- D. CENTERA\_PEA\_LOCATION

Correct Answer: D

---

**QUESTION 3**

A customer has an existing Gen4 cluster and purchased new Gen4LP nodes. Which requirement must be confirmed for the LP nodes to be successfully added?

- A. All nodes in the cluster must have the same drive sizes
- B. CentraStar code must be at 3.1.3 or later
- C. CentraStar code must be patched to sp3
- D. LP nodes must be access nodes in a heterogeneous cluster

Correct Answer: B

---

**QUESTION 4**

What is the purpose of the Centera SDK?

- A. Allows developers to integrate applications to Centera
- B. Allows EMC service access to internal system resources
- C. Allows users to access data on a Centera using standard mount points or mapped drives
- D. Helps manage and balance distribution of content within Centera

Correct Answer: D

---

#### QUESTION 5

Which type of backups are supported by CBRM?

- A. Incremental, Full, Automatic, Manual
- B. Incremental, Full, Differential, Automatic
- C. Incremental, Full, Differential, Continuous
- D. Incremental, Full, Differential, Date Range

Correct Answer: D

---

#### QUESTION 6

An email archiving application writes the same 1 MB attachment 20 times to EMC Centera. The EMC Centera is set to storage strategy capacity, CPM, and running CentraStar 3.1.0.

After this ingest is finished, the customer claims SIS is not working because these ingests took more than 40 MB of metadata capacity on the cluster.

How can this be explained?

- A. Detection and elimination of identical BLOBs is a background process and is not immediate
- B. SIS has to be done by the application server when archiving emails
- C. Storage strategy capacity needs CentraStar 3.1.3 to work correctly
- D. Threshold is set incorrectly, thus all objects are stored with GM naming schemes

Correct Answer: A

---

#### QUESTION 7

An object is written to EMC Centera using an application profile. To which pool will the clip always belong?

- A. Cluster Pool
- B. ConsoleArchive Pool

- C. System Pool
- D. ONLY the homepool of the profile

Correct Answer: A

---

**QUESTION 8**

Which operating system does EMC Centera Console support?

- A. Aix
- B. HP-Ux
- C. Linux
- D. Windows

Correct Answer: D

---

**QUESTION 9**

A file, with a 7-year retention, is written into an application pool on a cluster that has the CE+ compliance license enabled.

After its retention has expired, can that file be deleted?

- A. No, EMC Centera is a WORM device due to the license
- B. No, retention on any pool is overwritten due to the compliance license
- C. Yes, as long as the data is written with the emcservice profile
- D. Yes, once the retention value in the clip has expired the object can be deleted

Correct Answer: D

---

**QUESTION 10**

You are implementing a CentraStar 3.1 EMC Centera and attempting to create a storage pool, but you get an error that the virtual pool migration task must be run.

You go to the EMC Centera Viewer under Tools/Service/Virtual Pools/Start PoolMigration to do this, but now get the error that the Pool Migration failed.

What step is needed to allow the Pool Migration task to complete?

- A. Log in as "admin" and unlock the storage nodes, then run the Pool Migration task
- B. Log in as "emcexpert" and run the Pool Migration task

- C. Log in as "emcservice" and run the Pool Migration task
- D. Log in as "emcservice" and unlock the access nodes, then run the Pool Migration task

Correct Answer: A

---

#### QUESTION 11

When using a replication profile and PEA file, on which cluster is the PEA file created and on which cluster is it specified using the set cluster replication command?

- A. Both create and specify on the source
- B. Both create and specify on the target
- C. Create on the source, specify on the target
- D. Create on the target, specify on the source

Correct Answer: D

---

#### QUESTION 12

What type of content is typically stored on Centera?

- A. Dynamic
- B. Fixed
- C. OLTP
- D. Transactional

Correct Answer: D

---

#### QUESTION 13

A customer installed a new EMC Centera and configured it for CE+ security settings, but they want to monitor the EMC Centera through an access node.

Which EMC package provides the customer the ability to monitor an EMC Centera in CE+ mode?

- A. EMC Centera CLI
- B. EMC Centera Console
- C. EMC Centera Viewer
- D. EMC ControlCenter

Correct Answer: B

---

**QUESTION 14**

When installing CUA on a Gen4 node, which node is used to reimage the CUA?

- A. PxE node
- B. Principal node
- C. Spare node
- D. Storage node

Correct Answer: A

---

**QUESTION 15**

A user states that their AIX application can NOT access the mountpoint they just created on the CUA. Which menu choice on the CUA Setup Utility > Configuration Options is most appropriate to help in this situation?

- A. Configure Centera Universal Access
- B. Configure FTP Access
- C. Modify CIFS Configuration
- D. Modify NFS Configuration

Correct Answer: D
