QUESTION 1

You have three repositories A ,B and C and the following objects (assume all objects are valid). How should you specify the default identity for the three repositories?

- A. sMgr.setIdentity ("*" , loginInfoObj);
- B. sMgr.setIdentity ("A,B,C", loginInfoObj);
- C. sMgr.setIdentities ("A,B,C", loginInfoObj);
- D. sMgr.setIdentities ("*", loginInfoObj);

Correct Answer: A

QUESTION 2

Where do you need to establish a user session with the repository in order to run the following code?

- A. A user session is not needed.
- B. A user session must be established at least once before this code is reached.
- C. A user session needs to be established immediately after this code is executed.
- D. A super user session needs to be established before this code is reached.

Correct Answer: A

QUESTION 3

What does the IDfCollection.getTypedObject() method return?

- A. all rows in the collection as a single object for later use
- B. a row in the collection for later use
- C. a row in the collection that must be used before the collection is closed
- D. an object of type IDfTypedObject that can be cast to an IDfPersistentObject

Correct Answer: B

QUESTION 4

What kind of module is used to create a Documentum Web Service?

- A. Type-based Business Object

- B. Service-based Business Object
- C. Web-based Business Object
- D. Custom Module

Correct Answer: B

QUESTION 5

What should a single business object JAR contain?

- A. only interface OR implementation classes
- B. only interface AND implementation classes
- C. interface classes, implementation classes and any resources file needed
- D. a single manifest file that contains references to any relevant dmc_jar objects

Correct Answer: A

QUESTION 6

What does the following code do?

- A. imports the document into the user's default folder
- B. imports the document into the "/Temp" cabinet since the location is not specified explicitly
- C. fails because the location is not specified
- D. imports the document into the "/System/DocumentsNotLinked" folder

Correct Answer: A

QUESTION 7

Which code should you use to create a copy of the current object and place it in CopyCab?

- A. `IDfSysObject sysObj = (IDfSysObject)session.getObject(myId);sysObj.link("/CopyCab");sysObj.savelock();`
- B. `IDfSysObject sysObj = (IDfSysObject)session.getObject(myId);sysObj.unlink("/SourceCab");sysObj.link("/CopyCab");sysObj .saveAsNew(false);`
- C. `IDfSysObject sysObj = (IDfSysObject)session.newObject(myId);sysObj.link("/CopyCab");sysObj.save();`
- D. `IDfSysObject sysObj = (IDfSysObject)session.getObject(myId);sysObj.unlink("/SourceCab");sysObj.link("/CopyCab");sysObj .save();`

Correct Answer: B

QUESTION 8

Under what circumstances should you call `IDfSessionManager.newSession()` instead of `IDfSessionManager.getSession()`?

- A. in a multi-threaded environment where there is a single session manager passed to a thread
- B. in a single threaded environment where more than one method is passed the `IDfSessionManager`
- C. in any multi-threaded environment
- D. in any class where a method is synchronized and is passed the `IDfSessionManager` as an argument or return type

Correct Answer: A

QUESTION 9

Which statement is true?

- A. You use the `IDfClient.getQuery` method to obtain an `IDfQuery` object.
- B. The `execute` method of an `IDfQuery` object returns an `IDfCollection`.
- C. The `execute` method of an `IDfQuery` object returns an `IDfEnumeration`.
- D. The `execute` method of an `IDfQuery` object only requires the repository name as a parameter.

Correct Answer: B

QUESTION 10

Given the following repositories that are projecting to the following Connection Brokers:

What is the output for the code, assuming you are using a session established to Docbase C from host2?

- A. null
- B. Docbase C
- C. Docbase B Docbase C
- D. Docbase A Docbase B Docbase C

Correct Answer: C

QUESTION 11

Given the following namespaces: Which namespaces are required in the stylesheet to execute XDQL queries?

- A. 1 and 2 only
- B. 1 and 3 only
- C. 1, 2 and 3 only
- D. 1, 2, 3 and 4

Correct Answer: C

QUESTION 12

What will the following method return when the object path contains multiple objects? `Public IDfPersistentObject getObjectByPath(String objectPath)`

- A. all objects in the object path
- B. always the first object in the object path
- C. always the last object in the object path
- D. an object in the object path that cannot be determined

Correct Answer: D

QUESTION 13

When is it appropriate to use `IDfSysObject.getFile(String fileName)` ?

- A. to get a file from the file system for an object
- B. to get the file to a specific location on the client machine with the default format
- C. to get a file and manipulate it in memory
- D. to get a specific page of the object and download it to the default location on the client machine with the default format

Correct Answer: B

QUESTION 14

Click the button.

Which interface is missing in the diagram? ***Missing Exhibit***

- A. IDfFolder
- B. IDfCabinet

- C. IDfPersistentObject
- D. IDfNonPersistentObject

Correct Answer: C

QUESTION 15

The log4j.properties file allows changing the logging severity according to the _____.

- A. name of the connected repository
- B. text of the messages themselves
- C. user privileges in the connected repository
- D. Java package containing the source code

Correct Answer: D
