- D. EMC Avamar

Correct Answer: A

QUESTION 6

Which backup device type(s) is supported for NMM Exchange backups?

- A. AFTD, Data Domain, and tape
- B. AFTD and Data Domain only
- C. Data Domain only
- D. Data Domain and tape only

Correct Answer: B

QUESTION 7

Which Dell EMC NetWorker database tracks detailed information about items backed up in a save set?

- A. Jobs database
- B. Resource database
- C. Media database
- D. Client File Index

Correct Answer: D

Client File Index (CFI): These databases can track each client backup file (path name), allowing users to browse the file backed up in a specific point in time. This information is very important for NetWorker but will not be discussed in this article. If you are interested in it, you can refer to NetWorker Administration Guide for more information about the index
