QUESTION 4

What are the principles of unified requirements management? (Select four.)

A. Run-time Service Model capturing standardization

B. Universal event correlation

C. Linking

D. Collaboration

E. Application sensitive storage management

Correct Answer: ABCD

QUESTION 5

Which discovery questions might you ask an IT executive, particularly the VP of Applications, relating to how applications that meet the business needs are delivered? (Select three.)

A. Are you able to manage compliance - from infrastructure to applications?

B. Do you regularly deliver applications on time and to budget, covering all the required functionality?

C. How often does one team work on a problem and then realize another team worked on the same issue?

D. How do you currently deliver applications?

E. Are you aware of how much time you spend to keep lights on?

F. Do you know when an application/service will be ready for deployment into the production environment?

Correct Answer: BCD

QUESTION 6

What are the key terms associated with composite applications? (Select two.)

A. Automatic maintenance

B. Shared services

C. Application sensitive storage management

D. Virtualization

E. Provider-consumer

Correct Answer: BC

QUESTION 7

Which items best describe HP Software\'s solutions and benefits for managing security within ALM? (Select three.)

A. The integration of HP Fortify Software Security Center Solutions into ALM11 or QC10 bridges the functional gap between the IT security and pre-production testing (OA) and RandD (development) teams by facilitating defect tracking,

which improves the overall quality, performance, and security of production applications.

B. HP Fortify Software Security Center identifies and eliminates risk in existing applications and prevents the introduction of risk during application development.

C. HP Fortify Software Security Center provides a dashboard view of the security identifies and eliminate risk in database applications and prevents the introduction of risk during application development.

D. Secure ALM increases development productivity by automatically identifying and resolving security defects in production environments using Static Application Security Testing technology to reduce the total cost of security in production.

E. As part of a comprehensive secure software development program, Fortify\'s Static and Dynamic Application Security Testing solutions not only improve the security of the application but also increase development productivity by reducing the need to resolve security defects once in production.

F. HP Fortify Software Security Center identifies and effectively isolates vulnerable applications by the use of Threat Containment technology and intrusion detection systems, which results in more stable system availability and improved performance.

Correct Answer: ABD

QUESTION 8

Which business challenges are relevant to requirements management? (Select three.)

A. Forty percent of project budgets are wasted due to poor requirements.

B. There is a lack of visibility and traceability throughout application lifecycle.

C. The VP of Apps needs a way to visualize the state of application quality.

D. There is no single system of record for requirements definition and management. Business analysts need a way to prototype my applications.

E. Development is not linked into the application lifecycle.

Correct Answer: ABC

QUESTION 9

What are the key capabilities required for performance validation? (Select three.)

A. local simulation of third-party services

B. detection, prioritization, isolation, diagnosis, reparation, and prevention of application performance and availability issues

C. visibility on root-cause of performance issues

D. broad range of application support (including RIA and mobile)

E. advanced performance analysis and reporting

F. complete version control and change management

Correct Answer: BCE

QUESTION 10

Why is enterprise release planning and tracking so important for today\\'s business processes?

A. because mobile computing is growing rapidly and must be managed effectively

B. because businesses need to enforce standardization and compliance

C. because of budget constraints

D. because business initiatives cross multiple applications

Correct Answer: B
