- A. Risk bearing
- B. Risk avoiding
- C. Risk neutral

Correct Answer: B

QUESTION 6

When we are at our desk, we want the information system and the necessary information to be available. We want to be able to work with the computer and access the network and our files. What is the correct definition of availability?

- A. The degree to which the system capacity is enough to allow all users to work with it
- B. The degree to which the continuity of an organization is guaranteed
- C. The degree to which an information system is available for the users
- D. The total amount of time that an information system is accessible to the users

Correct Answer: C

QUESTION 7

Some threats are caused directly by people, others have a natural cause. What is an example of an intentional human threat?

- A. Lightning strike
- B. Arson
- C. Flood
- D. Loss of a USB stick

Correct Answer: B

QUESTION 8

Which of the following measures is a preventive measure?

- A. Installing a logging system that enables changes in a system to be recognized
- B. Shutting down all internet traffic after a hacker has gained access to the company systems
- C. Putting sensitive information in a safe
- D. Classifying a risk as acceptable because the cost of addressing the threat is higher than the value of the information at risk

Correct Answer: C

QUESTION 9

You are the first to arrive at work in the morning and notice that the CD ROM on which you saved contracts yesterday has disappeared. You were the last to leave yesterday. When should you report this information security incident?

- A. This incident should be reported immediately.
- B. You should first investigate this incident yourself and try to limit the damage.
- C. You should wait a few days before reporting this incident. The CD ROM can still reappear and, in that case, you will have made a fuss for nothing.

Correct Answer: A

QUESTION 10

The company Midwest Insurance has taken many measures to protect its information. It uses an Information Security Management System, the input and output of data in applications is validated, confidential documents are sent in encrypted form and staff use tokens to access information systems. Which of these is not a technical measure?

- A. Information Security Management System
