- C. Rename tables during the restoration.
- D. Return materialized views to their original state.

Correct Answer: D

QUESTION 2

nzbackup/nzrestore with the -user option has been replaced with which option to allow multi-level security (MLS) information, such as categories, cohorts, and levels to be backed up/restored?

- A. -all
- B. -mls
- C. -users
- D. -globals

Correct Answer: D

QUESTION 3

Which condition will interrupt a query running on a fully operational PureData System for Analytics?

- A. One fan fails.
- B. One disk fails.
- C. Active host fails.
- D. One power supply fails.

Correct Answer: C

QUESTION 4

The primary copy of a dataslice is spread across how many disks?

- A. 1.

- B. 2.
- C. 4.
- D. 12.

Correct Answer: A

QUESTION 5

Short Query Bias (SQB) allows for reserved resources to be used for which type of query?

- A. Queries with no joins.
- B. Queries returning only one row in the result set.
- C. SQL statements less than 255 characters in length.
- D. Queries with a runtime estimation of less than 2 seconds.

Correct Answer: D

QUESTION 6

The query history data collected DOES NOT provide insight to which of the type of performance and behavior questions?

- A. The typical or most common types of queries.
- B. The longest and shortest running queries on the system.
- C. The queries submitted by specific users or groups of users.
- D. The rotational speed of the disk drives during query execution.

Correct Answer: D

QUESTION 7

Which will result in support for zonemaps on the LastName column?

- A. CREATE TABLE TableA (LastName VARCHAR(20));
- B. CREATE TABLE TableA (LastName VARCHAR(20)); ALTER TABLE TableA ZONEMAP ON (LastName);
- C. CREATE TABLE TableA (LastName VARCHAR(20)) DISTRIBUTE ON (LastName);
- D. CREATE TABLE TableA (LastName VARCHAR(20)); CREATE MATERIALIZED VIEW ViewA AS SELECT * FROM TableA ORDER BY LastName;

Correct Answer: D

QUESTION 8

What is the state of the two hosts on a properly functional PureData System for Analytics Appliance?

- A. Active - Active
- B. Active - Stand by
- C. Stand by - Backup
- D. Stand by - Passive

Correct Answer: B

QUESTION 9

Which condition will NOT fail or restart a running query on a PureData System for Analytics Appliance?

- A. Disk resets or fails.
- B. Host resets or fails.
- C. S-Blade resets or fails.
- D. Snippet Processing Unit (SPU) resets or fails.

Correct Answer: A

QUESTION 10

What is the fastest join utilized by PureData System for Analytics?

- A. Hash join.
- B. Merge join.
- C. Expression join.
- D. Cross product join.

Correct Answer: A

QUESTION 11

Zone Maps provide what information about a table?

- A. The list of unique column values found within an extent.
- B. An index pointer to each row's exact location in the base table.

- C. The minimum and maximum column values found within an extent.
- D. The connection between the map and reduce stages when using MapReduce.

Correct Answer: C

QUESTION 12

Which statement is true about a simple load using external tables?

- A. The load can be configured to automatically continue to load if the S-Blade resets or fails.
- B. The load can be configured to automatically create a backup file of the table being loaded.
- C. The load can be configured to automatically create a duplicate copy of the table being loaded.
- D. The load can be configured to automatically remove duplicate rows from the table being loaded.

Correct Answer: A

QUESTION 13

When is the ToplogyImbalance event triggered?

- A. When a SAS switch has failed.
- B. When the path the path between an S-Blade and its disks has failed.
- C. When a disk enclosure\'s voltage sensor is reading outside the nominal range.
- D. When an S-Blade has ownership of more dataslices than is optimal (usually following a disk replacement).

Correct Answer: D

QUESTION 14

What is required to troubleshoot a query?

- A. nzevents and the pg.log.
- B. nzsql and the ODBC config.
- C. nzinventory and the dbos.log.
- D. nzdumpschema and the execution plan.

Correct Answer: D

QUESTION 15

What is the maximum number of columns you can choose as organizing keys for clustered base table?

- A. 1
- B. 2
- C. 4
- D. 8

Correct Answer: C
