100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by IBM Official Exam Center

- ⚙️ **Instant Download** After Purchase
- ⚙️ **100% Money Back** Guarantee
- ⚙️ **365 Days** Free Update
- ⚙️ **800,000+** Satisfied Customers

**QUESTION 1**

According to NIST, how is cloud computing defined?

- A. A model for enabling convenient, on-demand network access to a shared pool of compute resources
- B. On-demand non configurable computer resources that can be rapidly provisioned
- C. The capability to provide dedicated network access that can be provisioned in batch mode
- D. A model for delivering a dedicated pool of computing resources on premises

Correct Answer: A

---

**QUESTION 2**

What describes IBM Event Streams?

- A. It is used to connect different applications and have event trigger actions between applications
- B. It enables a fast message provisioning capability in the cloud
- C. It enables the extension of enterprise messaging to the cloud
- D. It is a high throughput message bus built with Apache Kafka

Correct Answer: D

---

**QUESTION 3**

Power Systems Virtual Servers on IBM Cloud offers the choice of which machine types when provisioning?

- A. Rockhopper
- B. z/15
- C. E880 and S922
- D. FlashSystem 5200

Correct Answer: C

---

**QUESTION 4**

What are three support models supported by IBM Cloud?

- A. Silver, Advanced, Gold
- B. Silver, Gold, Premium

- C. Basic, Silver, Gold
- D. Basic, Advanced, Premium

Correct Answer: D

---

#### QUESTION 5

What is a resource group in IBM Cloud?

- A. Application resources that have been placed in the same zone
- B. A container for resources to which access privileges can be assigned
- C. A set of provisioned services labeled with the same tag
- D. A group of resources that can be created on demand using a Teraform script

Correct Answer: D

---

#### QUESTION 6

Which factor motivates companies to increasingly adopt the use of the cloud, transforming their environments at the same time reducing the size of legacy systems and reducing costs?

- A. Virtual servers can be migrated between dedicated hosts based on workload requirements
- B. All public cloud resources can be freely accessed by every member all the time
- C. A full on premises service stack that enables highly available, redundant, and isolated client solutions
- D. The power, scalability, flexibility, and pay-as-you-go economics of the cloud

Correct Answer: D

---

#### QUESTION 7

Which IBM Cloud compute option provides access to IBM Z technology without having to purchase, install, and maintain unique hardware?

- A. Hyper Protect Virtual Server
- B. Bare Metal Server
- C. VMware Server
- D. Mainframe Server

Correct Answer: D

---

**QUESTION 8**

As part of a VPC, what do Access Control Lists provide?

- A. Subnet level firewall capabilities
- B. Ability to restrict user access by role
- C. Ability to prevent DDoS attacks
- D. Governance for privileged access

Correct Answer: A

---

**QUESTION 9**

What describes a Public Gateway?

- A. It is a service that distributes connections to VPC-hosted web sites evenly across zones
- B. It provides an encrypted network tunnel between the VPC and on-premises networks for management
- C. It enables communication to the internet for all virtual server instances on the attached subnet
- D. It is configured through rules to allow traffic to reach the network interface of attached VSIs

Correct Answer: C

---

**QUESTION 10**

Which IBM Cloud service is used for an automated agent-based backup system?

- A. IBM Cloud Object Storage
- B. IBM Cloud Backup
- C. IBM Block Storage
- D. IBM File Storage

Correct Answer: B

---

**QUESTION 11**

What is the common name used to refer to a virtual instance that runs on a hypervisor?

- A. Bare Metal Server
- B. Dynamic LPAR
- C. Pod

D. Virtual Machine

Correct Answer: D

---

**QUESTION 12**

Which cloud platform are IBM Cloud Paks designed to exclusively run on?

- A. Docker
- B. Kubernetes
- C. IBM Cloud Code Engine
- D. OpenShift

Correct Answer: B

---

**QUESTION 13**

An application is comprised of a set of core functions such as product catalog, client ratings, user forums, and each function must be developed and deployed independently of each other. Which architecture supports this requirement?

- A. Microservices
- B. Platform-as-a-service
- C. Fowler
- D. Monolithic

Correct Answer: A

---

**QUESTION 14**

What are the key tenets of a hybrid cloud?

- A. Interoperability, scalability, and portability
- B. On-demand self-service, controlled zone network access, and measured service
- C. Usable, collaborative, and extensible
- D. Logging, auditing, and network isolation

Correct Answer: A

---

**QUESTION 15**

What is an example of a cloud native application?

- A. An application developed using an IBM Cloud hosted integrated development environment and deployed to production on a locally hosted virtual machine
- B. A software platform available exclusively on IBM Cloud
- C. A containerized application that is deployed on an orchestrated platform
- D. A Windows application designed to run both on IBM Cloud and on locally hosted environments

Correct Answer: A
