#### QUESTION 1

In Report Studio, which chart lets the report author plot a third measure?

- A. Area
- B. Bubble
- C. Scatter
- D. Progressive Column

Correct Answer: B

---

#### QUESTION 2

In Report Studio, a block object contains a text item in the page header. If the author reuses the block in the page footer, which of the following is true?

- A. The author can replace the child object with an object of a different type.
- B. The author must replace the child object with an object of the same type.
- C. The author can replace the parent object with an object of the same type.
- D. The author must replace the child object with an object of a different type.

Correct Answer: A

---

#### QUESTION 3

In Report Studio, an author is using a relationally modeled package and wants to filter a report to only include three specific products. If the author is not sure how to spell the product names, what is the fastest way to add the product names to the filter expression?

- A. Use a value prompt to have users select the product names.
- B. Use the Select Multiple Values feature to search for the product names.
- C. Add the product names from the Source tab in the Available components pane.
- D. Add the product names from the Data Items tab in the Available components pane.

Correct Answer: B

---

#### QUESTION 4

In Report Studio, an author creates a list report and adds four data items. The author then adds a crosstab to the report. Which of the following is true?

- A. Report Studio creates a new query for the crosstab report.
- B. Report Studio populates the crosstab with the four data items from the list.
- C. Report Studio links the crosstab to the same query as the list report.
- D. Report Studio automatically filters on data items that the list is filtered on.

Correct Answer: A

**QUESTION 5**

An author wants to apply formatting to a list report. In Report Studio, the author clicks a column in the list, clicks Select Ancestor, and then clicks List Columns. In this situation, which of the following is true?

- A. Formatting all columns will also format aggregate rows in the list.
- B. Formatting all columns overrides formatting for an existing formatted column in the list.
- C. Formatting all columns affects all subsequent objects added to the report page.
- D. Formatting all columns ensures any new columns added to the list will have the same formatting.

Correct Answer: D

**QUESTION 6**

In Report Studio, an author creates the following report:

Product line	Product type	Revenue
<Product line>	<Product type>	<Revenue>
<Product line>	<Product type>	<Revenue>
<Product line>	<Product type>	<Revenue>

The author wants the report to show the total revenue generated by each Product line. How can the author accomplish this?

- A. In Query Explorer, change the Rollup Aggregate Function property for the Revenue data item to Total.
- B. In Query Explorer, change the Rollup Aggregate Function property for the Product line data item to Total.
- C. In the layout, group the Product line column and then add an aggregate row showing total revenue values.
- D. In the layout, group the Product type column and then add an aggregate row showing total revenue values.

Correct Answer: C

**QUESTION 7**

In Report Studio, for which task would an author create a query calculator?

- A. Add report run-time information to a report.
- B. Apply conditional formatting to data in a report.
- C. Let users choose which filter to apply to a report.
- D. Derive additional information from the data source.

Correct Answer: D

---

**QUESTION 8**

In Report Studio, an author notices that the Revenue measure included in a list report has an Aggregate Function property of Total. What does this property mean?

- A. If the Auto Group and Summarize property for the query is set to No, the list displays total revenue values for the lowest level of detail in the report.
- B. If the Auto Group and Summarize property for the query is set to Yes, the list displays total revenue values for the lowest level of detail in the report.
- C. If the Auto Group and Summarize property for the query is set to No, the list displays total revenue values for highest level of detail in the report.
- D. If the Auto Group and Summarize property for the query is set to Yes, the list displays total revenue values for highest level of details in the report.

Correct Answer: B

---

**QUESTION 9**

In Report Studio, when creating a list report, what is the difference between creating a section and creating a header?

- A. Headers appear outside the list.
- B. Sections appear outside the list.
- C. Headers appear once at the top of the list.
- D. Sections appear once at the top of the list.

Correct Answer: B

---

**QUESTION 10**

In Report Studio, an author wants to conditionally format a list report according to the revenue generated by each product line. The Revenue data item does not appear in the list report but is contained in Query1.

Which of the following must the author do in order to apply this conditional formatng?

- A. Make the Revenue data item a property of Query1.
- B. Make the Revenue data item a property of the List object.
- C. Make the Revenue data item a property of the Page object.
- D. Make the Revenue data item a property of the Variable object.

Correct Answer: B
