QUESTION 1

The IBM Security Access Manager (ISAM) V9.0 deployment professional has recently discovered an entire deployment of over 100 junctions was performed incorrectly.

How can a repair operation be scripted for this, and future deployment personnel?

- A. Use the CLI SSH interface, navigating to isam-> admin and authenticating as sec_master.
- B. Use a text editor and create the correct junction XML files, then import them using the LMI.
- C. Use the LMI Secure Web Settings-> Reverse Proxy-> Manage-> Junction Management interface.
- D. Use the REST API interface `https://{appliance_hostname}/isam/pdadmin`, JSON files and the CURL utility.

Correct Answer: C

QUESTION 2

A customer deployment consists of a large number of virtual host functions definitions. During a troubleshooting session the deployment professional realizes the WebSEAL logs do not distinguish between requests to different virtual hosts.

How can this be remediated?

- A. Customize the message log to include the relative URL
- B. Customize the request log to include the relative URL
- C. Customize the message log to include the absolute URL
- D. Customize the request log to include the absolute URL

Correct Answer: D

QUESTION 3

The IBM Security Access Manager V9.0 deployment professional has enabled the Reverse proxy pdweb, sescache statistic to troubleshoot a problem.

What is the problem?

- A. HTTP sessions are being timed out prematurely.
- B. HTTP requests are taking longer than expected.
- C. User sessions are terminated sooner than expected.
- D. Document caching is not as effective as anticipated.

Correct Answer: B

QUESTION 4

A company is using the embedded LDAP server to store IBM Security Access Manager V9.0 user data. However, there is a requirement to create another suffix to hold a set of user data.

Which two suffix elements are supported when creating a top level entry for the suffix? (Choose two.)

- A. c
- B. l
- C. dn
- D. st
- E. cn

Correct Answer: AB

QUESTION 5

A company wants to use a different authentication option than username and password to access the company's web portal. The security deployment professional is in the process of deploying an IBM Security Access Manager 9.0.0 solution for the company to protect its web portal.

Which authentication method should the deployment professional consider?

- A. NTLM Authentication
- B. Basic Authentication
- C. Form based Authentication
- D. Client-side certificate authentication

Correct Answer: B

QUESTION 6

The Distributed Session Cache has been enabled to replace the Session Management Server in a recently migrated IBM Security Access Manager V9.0 environment. Several Reverse Proxies have not yet been migrated from ISAM V7.0. The help desk is now receiving user complaints due to multiple logins required for applications protected by the ISAM V7.0 Reverse Proxies.

Which Distributed Session Cache option should be checked?

- A. enable_sms-functionality
- B. provide_700_attribute_ids

- C. Replicate certificate databases
- D. Support internal and external clients

Correct Answer: C

QUESTION 7

An IBM Security Access Manager (ISAM) V9.0 customer is deploying a new WebSphere based Java application and wants to protect it via an ISAM Web Reverse Proxy. The user registries are not shared between ISAM and Websphere Application Server.

Which trust configuration can be used to achieve Single Sign On between ISAM Web Reverse Proxy and Websphere Application Server?

- A. LTPAToken
- B. LTPAToken Version 2
- C. SPNEGO Trust Association Interceptor
- D. Extended Trust Association Interceptor plus (eTAI)

Correct Answer: A

QUESTION 8

An IBM Security Access Manager (ISAM) V9.0 deployment professional has downloaded the ISAM V9.0 installation files from the IBM Passport Advantage site. XenServer 6.2 will be the hypervisor technology used for a new ISAM Virtual Appliance installation.

What is the installation media file type needed to deploy the new ISAM appliance on XenServer?

- A. pkg file
- B. img file
- C. vhd file
- D. ove file

Correct Answer: C

Reference: <http://www-01.ibm.com/support/docview.wss?uid=swg27046801andaid=12> (21)

QUESTION 9

A deployment professional needs to update the certificate used by the LMI.

Which steps should the deployment professional follow to complete this task?

- A. Navigate in the LMI to manage system settings -> Management SSL Certificate -> Upload p12 file
- B. Navigate in the LMI to manage system settings -> Management SSL Certificate -> Request New Certificate from CA
- C. Navigate in the LMI to manage system settings -> Management SSL Certificate -> Update rt_profile_keys key file
- D. Navigate in the LMI to manage system settings -> Management Authorization -> Update rt_profile_keys key file

Correct Answer: B

QUESTION 10

An IBM Security Access Manager V9.0 systems deployment professional needs to protect a back-end web applications from SQL injection attacks that match signatures from the IBM X-Force signature database.

Which action needs to be performed?

- A. Simulation Mode must be enabled and a Risk Profile must be specified.
- B. Web Content Protection must be enabled and a Risk Profile must be specified.
- C. Simulation Mode must be enabled and a Registered Resource must be specified.
- D. Web Content Protection must be enabled and a Registered Resource must be specified.

Correct Answer: A

QUESTION 11

What out-of-the-box feature of IBM Security Access Manager (ISAM) V9.0 enables invalidating a defined collection of back-end server generated HTTP cookies when the user logs off WebSEAL?

- A. cookie jar
- B. /pkmslogout
- C. logout-remove-cookie attribute in webseal.conf
- D. -k option on junction create command (server task create)

Correct Answer: D

QUESTION 12

A customer received a replacement hardware appliance, but on boot up it has a different firmware than that for IBM Security Access Manager (ISAM) V9.0. The appliance needs to be flashed to ISAM V9.0. The appliance needs to be rebooted with a bootable USB drive formatted as FAT32.

Which file format is needed to create the bootable drive?

- A. .iso
- B. .ova
- C. .pkg
- D. .img

Correct Answer: A

QUESTION 13

A deployment professional has created an Access Control Policy to protect sensitive business information, but is not obtaining the desired result.

▼ Rules (4) ? Precedence: First ▼ ? Attributes: Optional ▼

1. If **riskScore < 40**
Then Permit
2. If **riskScore < 40**
userConsent is present and
userConsent = "true"
Then Permit with Obligation **Register Device**
3. If **riskScore < 40**
userConsent is missing
Then Permit with Authentication **Consent Register Device**
4. Deny

Add Rule ▼

Considering the rule precedence, which decision is returned for a user with a risk score of 40 and an ipAddress not considered malware?

- A. Deny
- B. Permit
- C. Deny after Authentication One-Time-Password
- D. Permit after Authentication One-Time-Password

Correct Answer: A

QUESTION 14

A deployment professional wants to ensure traffic from a Reverse Proxy to a junction backend application server goes out over a specific interface.

How can this be accomplished?

- A. Create a new management interface.
- B. Create a new application interface
- C. Create a static route to the backend server
- D. Create a new interface in the reverse proxy configuration file

Correct Answer: A

QUESTION 15

The appliance dashboard Reverse Proxy Health widget indicates a problem with the /snoop junction on the Test instance.

Which log file can be examined to find product errors?

- A. agent.log
- B. referer.log
- C. request.log
- D. msg_webseald-test.log

Correct Answer: C
