QUESTION 1

How is the IBM Tivoli Storage Manager (TSM) V7.1 administrative client installed?

- A. It is an option during the client installation.
- B. It is an option during the server installation.
- C. It is installed by default with the TSM client.
- D. It is installed by default with the TSM server.

Correct Answer: D

QUESTION 2

Which privilege class is required to register another IBM Tivoli Storage Manager administrator?

- A. system
- B. operator
- C. sysadmin
- D. unrestricted policy

Correct Answer: A

QUESTION 3

Which two types of encryption are supported by IBM Tivoli Storage Manager?

- A. Disk encryption
- B. Tape drive encryption
- C. Client-side encryption
- D. File storage pool encryption
- E. Storage area network encryption

Correct Answer: BC

QUESTION 4

What is a benefit of installing the web client?

- A. Utilization of cloud storage pools.

- B. Allows remote viewing of the Operations Center from any browser.
- C. Ability to configure Tivoli Storage Manager server schedules through the web client.
- D. Ability to perform backup, archive, restore, and retrieve operations from any browser.

Correct Answer: B

QUESTION 5

What is the default setting for collocation when a primary sequential access storage pool is defined?

- A. collocation no
- B. collocation yes
- C. collocation group
- D. collocation filespace

Correct Answer: C

QUESTION 6

What should the volume's access be set to for tapes created in a copy storage pool and moved to a disaster recovery location?

- A. offline
- B. offsite
- C. readwrite
- D. drlocation

Correct Answer: B

QUESTION 7

A scheduled incremental backup is performed on a daily basis, but when a restore is performed the file is not there. What might be the cause?

- A. The file was not included with an include statement.
- B. The node was replicated to another site but never backed up.
- C. The file is being excluded from backup because of an exclude statement.
- D. The node did not backup because the file was prefixed by an include.archive statement.

Correct Answer: A

QUESTION 8

An IBM Tivoli Storage Manager administrator has 123 nodes backing up to the server. Over several weeks the administrator notices that more volumes are being used up even when the amount of data has not increased significantly. What are two reasons why this would happen?

- A. Collocation by volume group for LTOPOOL
- B. Collocation by node for LTOTAPE storage pool is set.
- C. Reclamation threshold for LTOTAPE storage pool is set to 1.
- D. Reclamation threshold for LTOTAPE storage pool is set to 50.
- E. Reclamation threshold for LTOTAPE storage pool is set to 100.

Correct Answer: AD

QUESTION 9

Which file contains information on file at the DB2 level, including all activities and reason for crashes?

- A. activity log
- B. db2diag.x.log
- C. system log file
- D. db2 errorlog file

Correct Answer: B

QUESTION 10

Which two statements are true when performing virtual machine backups directly to tape?

- A. Single file restores need more time.
- B. An additional disk pool is required for the VMware backups of user data.
- C. TSM meta data (control data) must reside on a disk-based storage pool.
- D. The environment is adjusted automatically for optimum tape performance.
- E. The same functionality is available regardless of the type of storage pool used.

Correct Answer: AC

QUESTION 11

A customer has recently purchased six LTO Ultrium Generation 6 tape drives to add to their existing library that is already populated with four LTO Ultrium Generation 5 tape drives. What would be the maximum setting for the MOUNTLIMIT parameter in the device class for the LTO5 tape drives?

- A. 4
- B. 6
- C. 8
- D. 10

Correct Answer: B

QUESTION 12

When upgrading from IBM Tivoli Storage Manager (TSM) V5to TSM V7.1, which two steps should be performed before starting the upgrade process?

- A. Back up the copypool data.
- B. Uninstall the V5 server and client.
- C. Back up the V5 database and configuration files.
- D. Install the database configuration tool (DB2CNFG).
- E. Install the upgrade utilities package (DSMUPGRD).

Correct Answer: CE

QUESTION 13

When switching from schedule mode polling to server-initiated sessions which statement is true when contacting the client?

- A. The next backup will be a full backup.
- B. . The server will use SSL to access the client.
- C. The server will use information from a register node.
- D. The server will prompt for information from the client.

Correct Answer: C

QUESTION 14

What is the purpose of the duration option in the expire inventory command?

- A. It specifies how often the process should run.

- B. It specifies how long to keep archived objects before they can be expired.
- C. It specifies the maximum number of minutes for the expiration process to run.
- D. It specifies how long the objects must reside in the storage pool before they can be expired.

Correct Answer: C

QUESTION 15

What is the purpose of the command query systeminfo?

- A. It shows the system state of the OS.
- B. It collects information that helps to analyze the client problem.
- C. It shows the IBM Tivoli Storage Manager (TSM) options (client and server).
- D. It shows the complete TSM status (client and server).

Correct Answer: B
