-  **800,000+** Satisfied Customers

QUESTION 1

Where can we see the results of Time Series analysis in SAP IBP?

- A. Time Series Property Attribute in Customer Source
- B. Time Series Property Attribute in Customer Product
- C. Time Series Property Attribute in Customer
- D. Time Series Property Attribute in Product

Correct Answer: D

QUESTION 2

What function would you use to configure a year-to-date calculation?

- A. Cumulative Aggregation
- B. Dynamic Rolling Aggregation
- C. Rolling Aggregation
- D. Last Period Aggregation

Correct Answer: A

QUESTION 3

Which are the mandatory preconditions for an attribute that can be used for saving the segmentation results? Note: There are 2 correct Answers to this question.

- A. It should be a non-key attribute of the master data type.
- B. The length of the attribute needs to be 18 digits.
- C. It belongs to a simple or compound master data type.
- D. Its data type is INTEGER and its length has been specified.

Correct Answer: AC

QUESTION 4

You are working on a mid-range plan that spans the seasonal peak and you are evaluating the need for additional crewing. Which of the following parameters can you model to plan production with extra shift(s)?

- A. Incremental production values

- B. Capacity expansion with additional costs
- C. Production source validity at the start of seasonal peak
- D. Adjusted production interactive values

Correct Answer: B

QUESTION 5

While modeling for a large machine with high capital needs, you need it to run cost effectively with minimum utilization, even if it means producing more than demand. Which solution would apply to this scenario? Note: There are 2 correct Answers to this question.

- A. Capacity leveling will be possible for production and storage resources.
- B. Excess stock can be generated and will need to be staged in an overflow warehouse.
- C. Enough demands can be pulled forward and pull production will occur.
- D. Balance can be achieved between excessive prebuild and minimum utilization by incorporating violation costs.

Correct Answer: CD

QUESTION 6

Which of the following conditions are relevant for subtotals in the planning view? Note: There are 2 correct Answers to this question.

- A. Only attribute-based totals can be added to the planning view.
- B. The total value can be added before or after the selected attribute.
- C. The values of the attribute-based total at the highest attribute level in the planning level can be changed.
- D. The total number of attributes that can use subtotals in the planning view can be restricted.

Correct Answer: BD

QUESTION 7

Which supply chain challenge is addressed by SAP IBP for demand?

- A. Inability to respond to short-term changes in supply and demand
- B. Inability to arrive at consensus demand
- C. Inability to synchronize supply and demand
- D. Inability to understand and shape actual demand

Correct Answer: D

QUESTION 8

What are some of the prerequisites for configuring a planning area that results in a successful consistency check? Note: There are 2 correct Answers to this question.

- A. Configure at most two input key figures on the same planning level in a key figure calculation.
- B. Assign the compound master data type and its component master data types.
- C. Specify a planning horizon in the planning area for each level of the assigned time profile.
- D. Configure at least one calculated key figure for the planning area.

Correct Answer: BC

QUESTION 9

Which library is used by the forecasting engine for the demand sensing algorithm?

- A. Predictive analytics library
- B. Demand library
- C. Supply chain algorithm library
- D. Heuristics library

Correct Answer: C

QUESTION 10

What does ABC/XYZ segmentation allow you to do? Note: There are 2 correct Answers to this question.

- A. Assign more appropriate inventory algorithms to planning objects.
- B. Tailor your forecast strategy and inventory optimization to segment characteristics.
- C. Identify inventory items that require closer attention.
- D. Analyze forecast accuracy by product class.

Correct Answer: BD

QUESTION 11

What are the ways to achieve rolling aggregation with SAP IBP?

- A. Using attribute as a key figure
- B. Using key figure calculation
- C. Using local member
- D. Using aggregation mode average

Correct Answer: D

QUESTION 12

Which conditions are prerequisites for key figure disaggregation?

- A. The key figure is calculated and editable.
- B. The key figure is calculated and aggregation mode is selected.
- C. The key figure is set to Not Editable.
- D. The key figure is stored and editable.

Correct Answer: D

QUESTION 13

What setting is mandatory in the Manage Lifecycle Planning app when introducing a new product?

- A. Define which phase-in and phase-out profiles can be used within Lifecycle Planning
- B. Define which key figure can be used as sales history for new products
- C. Define at least one attribute of the planning area which represents the Product ID
- D. Define which is the attribute ID for the Lifecycle profiles

Correct Answer: B

QUESTION 14

Which header name displays are available in the Report Options menu of the SAP IBP Excel interface? Note: There are 2 correct Answers to this question.

- A. Changed member names that the user had created
- B. Caption, as defined in configuration for the default name
