**QUESTION 1**

A cloud engineer is migrating an application running on an on-premises server to a SaaS solution. The cloud engineer has validated the SaaS solution, as well as created and tested a migration plan. Which of the following should the cloud engineer do before performing the migration? (Choose two.)

- A. Document in the change management database.
- B. Document the test findings.
- C. Gain approval from the CAB.
- D. Create a rollback plan.
- E. Submit a request for change.
- F. Agree upon a change windows.
- G. Establish a plan of action.

Correct Answer: DG

---

**QUESTION 2**

Which of the following is commonly the MAIN concern in public cloud implementations?

- A. Security
- B. Flexible Billing
- C. Scalability
- D. Availability

Correct Answer: A

---

**QUESTION 3**

A company has an SLA of 15ms for storage latency.

	90 days ago	60 days ago	30 days ago	Now
Space usage	60%	70%	75%	80%
Average latency	8ms	10ms	15ms	25ms
Storage CPU utilization	50%	65%	80%	95%

Given the above metrics, which of the following is the MOST appropriate change to the environment?

- A. Add computing nodes and data nodes on the storage side.
- B. Add more storage shelves to the current array.
- C. Enable compression on the storage side.
- D. Enable deduplication on the storage side.

Correct Answer: C

---

#### QUESTION 4

When a customer requests a VM to perform at higher levels the administrator should (Select two):

- A. increase the VMs vRAM.
- B. increase RAM on the host.
- C. migrate the VM to a faster online host.
- D. increase the VMs vCPU count.
- E. increase disk space.

Correct Answer: AD

---

#### QUESTION 5

When designing a new private cloud platform, a cloud engineer wants to make sure the new hypervisor can be configured as fast as possible by cloning the OS from the other hypervisor. The engineer does not want to use local drives for the hypervisors. Which of the following storage types would BEST suit the engineer's needs?

- A. CAS
- B. NAS
- C. DAS
- D. SAN

Correct Answer: D

---

#### QUESTION 6

Host A and B can both access LUNs one to ten in a single SAN LUN 11 has been created and Host A can access it but Host B cannot. Which of the following will likely be the cause of this issue?

- A. Faulty fiber HBA
- B. Incorrect HBA WWPN

- C. Incorrect HBA software version
- D. Defective HBA

Correct Answer: B

---

#### QUESTION 7

Users are reporting slow performance on a virtual server. An administrator notices that the virtual CPU is at 50%. Which of the following should the administrator check on the host?

- A. I/O throttling
- B. CPU wait time
- C. Swap files
- D. Memory ballooning

Correct Answer: B

---

#### QUESTION 8

After monthly patching, a large number of users who are logged onto the network report that application links from a company's intranet site, which previously opened directly into the website, are now prompting for logon information. Application administrators confirm that the websites in question are working properly. Which of the following is the MOST likely cause of the new behavior?

- A. SSO issues
- B. Password expiration
- C. Account lockout
- D. Certificate expiration

Correct Answer: A

---

#### QUESTION 9

An administrator is attempting to troubleshoot an issue between a web server in the DMZ and an internal workstation by reviewing packet captures. Upon inspection, the payloads of the packets are unreadable. Which of the following could be the cause of this issue?

- A. The administrator has yet to authenticate to the network
- B. The sniffer is located on an incorrect subnet
- C. A vulnerability scanner has interfered with the packet capture
- D. End-to-end encryption is applied on the network

Correct Answer: A

---

**QUESTION 10**

Which of the following cloud service models would be recommended to a company for hardware capacity to host a production database application?

- A. CaaS
- B. XaaS
- C. IaaS
- D. PaaS

Correct Answer: D

---

**QUESTION 11**

A company recently decided to move some of its servers to a public cloud. The engineer has been invited to attend requirement sessions for moving servers to the cloud. The engineer is tasked with ensuring the servers that are being moved to the cloud are still in compliance, as they were on-premises.

Which of the following should the engineer request during the requirement sessions?

- A. Syslog server
- B. Administrator access to the cloud service
- C. Configuration management tool
- D. Orchestration tool

Correct Answer: C

---

**QUESTION 12**

To enhance availability, a company has expanded its public cloud presence to multiple regions from a single CSP. The company wants to ensure resources in the public cloud are highly available to users at company headquarters.

Which of the following is the BEST solution to fulfill this requirement?

- A. Dual direct peering/connections from headquarters to one cloud region.
- B. Dual VPN connections over a single ISP from headquarters to one cloud region.
- C. Dual VPN connections over two separate ISPs from headquarters to both cloud regions.
- D. Dual direct peering/connections over a single ISP from headquarters to both cloud regions

Correct Answer: A

---

**QUESTION 13**

An administrator defines a backup as follows:

One weekly full backup Daily incremental backup

Which of the following BEST describes where the administrator would define this?

- A. Backup SLA document
- B. Backup orchestration workflow
- C. Backup schedule
- D. Provisioning schedule

Correct Answer: C

---

**QUESTION 14**

A company wants to implement a public IaaS solution but also wants to address site resiliency challenges.

When selecting an IaaS provider, which of the following should a cloud technician look for within the provider's capabilities to meet the requirements?

- A. Bare metal service
- B. Failure zones
- C. Backup services
- D. Dedicated connectivity

Correct Answer: D

---

**QUESTION 15**

A company is experiencing network access errors within one department that operates in a secure environment. The network administrator needs to investigate the configurations of the switches servicing that department to determine the cause of the network access errors. Which of the following tools should be used to directly access the switches in that department?

- A. AES
- B. RDP
- C. HTTP

D. SSH

Correct Answer: D
