QUESTION 2

When using the DD VTL Tape Out to Cloud feature, which status will a tape show once it is in the cloud tier vault?

- A. Offsite
- B. Offline
- C. Archived
- D. Vaulted

Correct Answer: D

QUESTION 3

Which port/protocol is used when using a syslog server to monitor a PowerProtect DD system?

- A. 514/UDP
- B. 2051/TCP
- C. 514/TCP
- D. 2051/UDP

Correct Answer: A

QUESTION 4

A PowerProtect DD appliance with two expansion shelves is being installed in a customer-provided rack.

When cabling the controller to the shelves, what is connected to the host port on the last shelf in the chain?

- A. Expansion port of the upstream shelf
- B. Host port of the controller
- C. Expansion port of the controller
- D. Host port of the downstream shelf

Correct Answer: A

QUESTION 5

Backup administrators have noticed slow backups on the AIX environment.

To fix the issue, what should the set large_send be for each NIC, and what should the NFS option be set to?

- A. no and nfs_rfc1323=0
- B. yes and nfs_rfc1323=0
- C. no and nfs_rfc1323=1
- D. yes and nfs_rfc1323=1

Correct Answer: D

QUESTION 6

An administrator recognizes poor network performance when using CIFS shares from a PowerProtect DD system. The network link utilization is under 100%.

What is the most likely cause of this issue?

- A. TCP window size too small
- B. TCP timeout too small
- C. TCP timeout too large
- D. TCP window size too large

Correct Answer: B

QUESTION 7

An administrator is migrating their old cloud tier-enabled Data Domain to a new PowerProtect DD appliance with cloud tier. During migration, the administrator recognizes that file system cleaning on the source system is not possible. What is the most likely cause of this behavior?

- A. Migration will restrict all activities on source systems.
- B. Migration will restrict all activities on both systems.
- C. Filesystem is disabled on source system.
- D. Source system is running in restricted mode.

Correct Answer: A

QUESTION 8

A customer needs to use DD Retention Lock Compliance to ensure that data integrity is maintained.

Which PowerProtect DD systems meet the customer's requirement?

- A. DD3300, DD6900, and DD9400
- B. DDVE, DD3300, and DD6900
- C. DD6900, DDVE, and DD9400
- D. DD9400, DDVE, and DD9900

Correct Answer: A

QUESTION 9

DRAG DROP

What is the order of steps to configure DD Boost on the backup host?

Select and Place:

Configure backup policies and groups to use the PowerProtect DD appliance	STEP 1
License the backup software if required	STEP 2
Create devices and pools	STEP 3
Configure clone or duplicate operations to use managed file replication	STEP 4

Correct Answer:

	License the backup software if required
	Create devices and pools
	Configure backup policies and groups to use the PowerProtect DD appliance
	Configure clone or duplicate operations to use managed file replication

For the backup host:

1.
License the backup software for DD Boost as required by the software manufacturer.
2.
Create devices and pools through the management console/interface.
3.
Configure backup policies and groups to use the Data Domain system for backups with DD Boost.
4.
Configure clone or duplicate operations to use Data Domain managed replication between Data Domain systems.

QUESTION 10

Which PowerProtect DD procedure uses the DoD/NIST standards to provide data security?

- A. Data Sanitization
- B. End-to-End Verification
- C. Replication Encryption
- D. Encryption

Correct Answer: A
