QUESTION 1

What is the process used to initiate a connection for change sets?

A. Modify the source org to allow an outbound connection to the target org

B. Modify the target org to accept an outbound connection from the source org

C. Modify the target org to accept an inbound connection from the source org

D. Modify the source org to allow an inbound connection to the target org

Correct Answer: AC

QUESTION 2

Universal Containers (UC) have developed a managed package targeted for AppExchange. The product includes some
Apex code to customize and create layouts. UC is in the testing phase of the package, so it\\'s not certified yet. During
testing on the target org, the Apex code for the layouts fails.

Why are the Apex classes not able to access the metadata of the target org during testing?

A. Apex Settings to allow the access to metadata is not switched on.

B. UC needs to turn on Apex Settings within the custom metadata type.

C. The solution is flawed. UC should utilize the Tooling API from a web service call to modify the layouts.

D. UC needs to get the managed package certified by the Salesforce security review.

Correct Answer: A

QUESTION 3

Universal Containers (UC) has many different business units, all requesting new projects to be built into a single
Salesforce Org. UC management is concerned with a lack of appropriate project properties and roadmap for the
Salesforce ecosystem. What should an Architect recommend?

A. Use design Standards for Governance.

B. Create a Center of Excellence with a charter document.

C. Create a Release Management Process.

D. Create project charters for each project.

Correct Answer: B

QUESTION 4

![Pass2Lead](https://Pass2Lead.com)
Universal Containers has a full sandbox that will be used to analyze and fix bugs found in production.

Which two items should the architect recommend to ensure that bugs found in production are more easily analyzed in this full sandbox?

Choose 2 answers

A. Refresh the full sandbox after every deployment in production.

B. Create a daily process of copying new and changed data in production to the full sandbox.

C. Before any deployment in production, the same process must be performed in this sandbox.

D. Perform a Refresh Data in the full sandbox.

Correct Answer: BC

QUESTION 5

Universal Containers has dozens of independent user acceptance and functional teams that need to test independently in isolation, and on current production data that was modified within the last week. Which Sandbox type should a Technical Architect recommend?

A. Developer Pro Sandbox

B. Partial Copy Sandbox

C. Developer Sandbox

D. Full Sandbox

Correct Answer: D

QUESTION 6

Universal Containers has 80% code coverage. Despite the creation of a test plan for each sprint, the number of defects is large.

What two items should the architect recommend to reduce defects?

Choose 2 answers

A. The test script should be used to define the test classes.

B. The code coverage should be increased to 95%.

C. The test analyst who creates the test plan must also create the test classes.

D. The acceptance criteria should have more details.

Correct Answer: AD

QUESTION 7

Universal Containers CUC) Customer Community is scheduled to go live in the Europe, Middle East, and Africa (EMEA) region in 3 months. UC follows a typical centralized governance model. Two weeks ago, the project stakeholders informed the project team about the recent changes in mandatory compliance requirements needed to go live. The project team analyzed the requirements and have estimated additional budget needs of 30^0 of the project cost for incorporating the compliance requirements.

Which management team is empowered to approve this additional budget requirements?

A. Security Review Committee

B. Project Management Committee

C. Executive Steering Committee

D. Change Control Board

Correct Answer: C

QUESTION 8

Universal Containers wants to implement a release strategy with major releases every four weeks and minor releases every week. Major releases follow Development, System Testing (SIT), User Acceptance Testing (UAT) and Training Minor releases follow Development and User Acceptance Testing (UAT) stages. What represents a valid environment strategy consideration for UAT?

A. Minor releases use Partial copy and Major releases use Full copy

B. Minor and Major releases use separate Developer pro

C. Minor releases use Developer and Major releases Full copy

D. Minor and Major releases use same Full copy.

Correct Answer: A

QUESTION 9

In Architect has been working on a large project for the past 6 months. This project must be live by the end of the current month. Which two planning techniques should the Architect use to ensure all metadata changes deploy smoothly and on time? Choose 2 answers

A. Ensure all code that is being deployed is checked into source control

B. Validate the final deployment package against production prior to go-live

C. Create a new sandbox and perform a test deployment to that environment

D. Upload a change set from sandbox to production as early as possible

Correct Answer: AB

QUESTION 10

Universal Containers (UC) development team is using an Agile tool to track the status of build items, but only in terms of stages. UC is not able to track any effort estimates, log any hours worked, or keep track of remaining effort. For what reasons should UC consider using the agile tool for effort tracking?

A. Allows the organization to track the Developers work hours for salary compensation purposes.

B. Allows the management team to make critical timeline commitments based solely on developer estimates.

C. Allows the Developer to compare their effort, estimates and actuals to better adjust their future estimates.

D. Allows the management team to manage the performance of bad developers who are slacking off.

Correct Answer: C

QUESTION 11

UC\\'sscale of Salesforce deployment has increased over time, leading to complexities. UC is finding too many bugs in the deployed code, which has become a challenge to the delivery team. The team wants to reduce the amount of bugys by ensuring all the developed code is reviewed, tested, and validated in the upstream deployment process.

Which three development practices will be best suited tp address UC\\'s concerns? Choose

A. Use continuous integration with automation testing.

B. Encourage the development team to be self-organizing.

C. Enable developer teams to do peer code review.

D. Incorporate test-driven deployment into the project structure.

E. Enable a short and timely feedback loop with customers

Correct Answer: ACD

QUESTION 12

Universal Containers (UC) has a recruiting application using Metadata API version 35, and deployed it in production last year. The current Salesforce platform is running on API version 36.A new field has been introduced on the object Apex page in API version 36. A UC developer has developed a new Apex page that contains the new field and is trying to deploy the page using the previous deployment script that uses API version 35.

What will happen during the deployment?

6 / 8

A. The deployment script will pass because the new field is backward compatible with the previous API version 35.

B. The deployment script will fail because the new field is not known for the previous API version 35.

C. The deployment script will pass because the new field is supported on the current platform version.

D. The deployment script will fail because the platform doesn\\'t support the previous API version 35.

Correct Answer: B

QUESTION 13

Universal Containers has multiple minor and major releases in a year .Minor releases have sample configuration changes, while major releases involve large number of complex code components. What is the deployment tools should an architect recommend for both types of releases?

A. Change sets for minor releases and Force.com IDE for major releases.

B. Change sets for both minor releases and major releases.

C. Change sets for minor releases and metadata API for major releases.

D. Force.com IDE for minor releases and metadata API for major releases.

Correct Answer: C

QUESTION 14

Universal Containers has discovered a Sev0 defect in production. Tens of thousands of records will be created with incorrect data in minutes, producing significant brand damage as a consequence. The Salesforce administrator has suggested that the defective text field be replaced with a new picklist field directly in production. The page layout will be modified so that the text-field is removed and the new picklist field added.

What should the Salesforce architect advise?

A. Deny the suggestion and explain to everyone that the risk is too high and the next release window is on the weekend.

B. Pair with the administrator, and review each change as it happens

C. Explain that only developers are certified to make changes directly in production.

D. Call the security team and begin organizing d penetration test.

Correct Answer: B

QUESTION 15

Universal Containers (UC) is planning for a huge data migration as part of their Service Cloud implementation. UC, has
