H13-311_V3.0^{Q&As}

HCIA-AI V3.0

Pass Huawei H13-311_V3.0 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

https://www.pass2lead.com/h13-311_v3-0.html

100% Passing Guarantee
100% Money Back Assurance

Following Questions and Answers are all new published by Huawei Official Exam Center

🔘 **Instant Download** After Purchase

🔘 **100% Money Back** Guarantee

🔘 **365 Days** Free Update

🔘 **800,000+** Satisfied Customers

QUESTION 1

Loss function and model function are the same thing.

A. TRUE B. FALSE

Correct Answer: B

QUESTION 2

Which of the following are solutions for the Huawei Cloud EI industry scenario? (Multiple Choice)

A. Intelligent Logistics

B. Intelligent Water

C. Intelligent transportation

D. Intelligent Finance

E. Intelligent manufacturing

Correct Answer: ABCDE

QUESTION 3

HUAWEI HiAI Which module does the face detection in the platform belong to?

A. HiAI Engine

B. HiAI Framework

C. HiAI Foundation

D. HiAI Service

Correct Answer: A

QUESTION 4

When training the network, we often encounter many problems. For the problem of gradient disappearance, we can alleviate the problem by choosing which of the following functions to use?

A. Softsign function

B. Relu function

C. tanh function

D. Sigmoid function

Correct Answer: B

QUESTION 5

What are the regularizations in deep learning? (Multiple Choice)

A. L1 norm. L2 norm

B. Data set enhancement

C. Integration method

D. Dropout

Correct Answer: ABCD

QUESTION 6

Regarding the face search service, which of the following statements are correct?

A. When there is no face set, you need to create a face set first, then add face data, and then search

B. The size of a face set cannot exceed 10000 Pictures

C. There is a dedicated interface to delete the specified face set

D. There is a dedicated interface to delete the face data in a certain face set

Correct Answer: ACD

QUESTION 7

Convolutional neural networks are more suitable for image recognition problems than cyclic neural networks.

A. True

B. False

Correct Answer: A

QUESTION 8

Which of the following statements about supervised learning is correct?

A. Decision tree is a supervised learning

B. Supervised learning cannot use cross-validation for training

C. Supervised learning is a rule-based algorithm

D. Supervised learning can be trained without labels

Correct Answer: A

QUESTION 9

What are the numeric types of Python? (Multiple Choice)

A. int (integer type)

B. long (long integer type)

C. float (floating point type)

D. complex (complex number type)

Correct Answer: ABCD

QUESTION 10

HUAWEI HiAI Empower APP What value?

A. Safety

B. stable

C. real time

D. at any time

Correct Answer: ABCD

QUESTION 11

tf.keras.datasets Can view keras The built-in data set.

A. TRUE

B. FALSE

Correct Answer: A

QUESTION 12

The constituent elements of the Python identifier include: numbers, letters, and underscores.

A. True

B. False

Correct Answer: A

QUESTION 13

Which of the following about the description of expectations and variances is incorrect?

A. Expectation reflects the average level of random variable values

B. The variance reflects the degree of deviation between the random variable and its mathematical expectation

C. Expectation and variance are both numerical characteristics of random variables

D. The greater the expectation the smaller the variance

Correct Answer: D

QUESTION 14

Which of the following is true about unsupervised learning?

A. Unsupervised algorithm only processes "features" and does not process ags?

B. Dimensionality reduction algorithm is not unsupervised learning

C. K-means algorithm and SVM algorithm belong lo unsupervised learning

D. None of the above

Correct Answer: A

QUESTION 15

Which of the following about the description of the number of rows and columns for the determinant is correct?

A. The number of rows 1s greater than the number of columns

B. The number of rows 1s equal lo the number of columns

C. The number of rows is less than the number of columns

D. The number of rows has no relationship with the number of columns.

Correct Answer: B
