- D. Other defects across all projects in the same domain
- E. Other defects in the same project

Correct Answer: BD

QUESTION 8

Put the steps for ALI workflow in the correct order.

Select and Place:

Add a build server to ALI.	
Review the Requirements for your build server, and perform any necessary configuration on the build server.	
Add build configuration.	
Customize ALI specific project list by using ALM Project customization.	
Configuration build change detection, and set a defect filter to limit the defects displayed on the build Report Defect Trend Graph.	
Make Sure you are working with a supported build system.	

Correct Answer:

- Make Sure you are working with a supported build system.
- Customize ALI specific project list by using ALM Project customization.
- Add a build server to ALI.
- Review the Requirements for your build server, and perform any necessary configuration on the build server.
- Add build configuration.
- Configuration build change detection, and set a defect filter to limit the defects displayed on the build Report Defect Trend Graph.

QUESTION 9

In the HP ALM Business Models module, how are path entities created?

- A. By selecting from a list of possible business process paths
- B. By dragging/dropping the desired alternate flows under the corresponding model entity in the Model Tree view
- C. Automatically, when importing a business process model into ALM
- D. By drawing arrows that link the hotspots available on the activities on the interactive Entities Pane

Correct Answer: A

QUESTION 10

What happens if you link a defect to a run? (Select two)

- A. The defect is indirectly linked to the run's steps because the run steps are lower-level.
- B. The defect is directly linked to the run and indirectly linked to the run's test instance, the test set, and the test.
- C. The defect is indirectly linked to the test instance and to the test set, but not to the test, because the link to the test instance prevails.
- D. The defect is indirectly linked to the test instance only, as indirect links only propagate to the nearest entity.
- E. If the corresponding test is covered by a requirement, an indirect link is also added to the requirement.

Correct Answer: AC

QUESTION 11

What can you define by configuring the Traceability Matrix? (Select three.)

- A. The associated cycles
- B. The requirements linked to and from the source requirements
- C. The tests linked to and from the test steps
