QUESTION 1

Which memory DIMM technology combines DRAM memory with flash memory to allow data to be retained in the event of power loss?

- A. LRDIMM
- B. RDIMM
- C. UDIMM
- D. NVDIMM

Correct Answer: D

QUESTION 2

Which statement describes a server failure predictive capability?

- A. It checks the free space on the disk partition
- B. It monitors the amount of corrected memory errors
- C. It verifies the disk controllers driver version
- D. It uses the ping command to verify networking connectivity.

Correct Answer: D

QUESTION 3

Which approach protects server data against natural disasters?

- A. deploying the solution in two data centers in different geographic locations
- B. configuring a redundant power subsystem at the server/enclosure level
- C. implementing a redundant UPS solution
- D. configuring storage replication within the data center

Correct Answer: A

QUESTION 4

What are two features of the Synergy Computer Module? (Select two.)

- A. Embeds the HPE OneView Management solution

- B. supports SAS, SATA(HDD . and Flash Storage
- C. provides module templates to monitor and flag capabilities with remediation
- D. uses one or two Appliance Bays for redundancy
- E. provides support for four Micro-Form drives with built-in RAID

Correct Answer: CD

QUESTION 5

Which blade enclosure component allows the aggregation of up to 16 iLO ports in an HPE c7000 enclosure?

- A. HPE Flex Fabric 20/40 F8 module
- B. HPE 40 Gb Ethernet Switch
- C. HPE Virtual Connect Enterprise Manager
- D. HPE Onboard Administrator

Correct Answer: A

QUESTION 6

A customer needs to verify the warranty status of a server blade running an important database

Which HPE tool can the customer use to verify the warranty or service contract status for a specific server blade?

- A. HPE insight Online
- B. HPE Onboard Administrator
- C. HPE Part Surfer
- D. HPE intelligent Provisioning

Correct Answer: A

QUESTION 7

What are competitive advantages of the HPE ProLiant Gen9 server? (Select two)

- A. standard proactive care
- B. lifetime warranty
- C. lower power consumption and less floor Space
- D. management of heterogeneous environments

E. increased storage capacity

Correct Answer: AC

QUESTION 8

Click and drag me memory type on me left to match it with Its description on the right.

Select and Place:

Memory type		Memory description
<input type="text" value="UDIMM"/>	<input type="text"/>	provides advanced error detection and memory register support
<input type="text" value="RDIMM"/>	<input type="text"/>	isolates the electrical loading of the DRAM from the system to allow for faster operation
<input type="text" value="LRDIMM"/>	<input type="text"/>	allows for performance optimization and configuration agility
<input type="text" value="NVDIMM"/>	<input type="text"/>	provides smaller capacity and basic error -correcting code

Correct Answer:

QUESTION 9

What is a feature of HPE Onboard Administrator?

- A. deploys a variety of operating systems including Windows and Linux
- B. reports blade server errors directly to HPE to quickly resolve problems
- C. performs initial configuration steps of the enclosure
- D. uses the UID to identify the enclosure

Correct Answer: B

QUESTION 10

Which HPE tool can the administrator use to turn on enclosure identification UID?

- A. HPE Insight Display
- B. HPE Intelligent Provisioning
- C. HPE OneView
- D. HPE Virtual Connect Manager

Correct Answer: C

QUESTION 11

What is an industry recommended best practice when placing and populating a rack of equipment?

- A. Place the heaviest Items in the top, and populate items from the top to the bottom
- B. Place the heaviest items in the bottom, and populate items from the bottom to the top
- C. Place the heaviest items on the bottom, and populate items from the top to the bottom
- D. Place the heaviest items on the top, and populate items from the bottom to the top

Correct Answer: B

QUESTION 12

Which value propositions are provided with the HPE Synergy master/satellite architecture? (Select two.)

- A. zero touch change management
- B. top of rack switch design
- C. 40 percent or more lower fabric hardware costs
- D. redundant HPE Onboard Administrators
- E. SAS fabric consolidation

Correct Answer: BC

QUESTION 13

Click and drag the HPE configuration tool on the left to its matching description on the right.

Select and Place:

Configuration tool	Description
HPE Elite	enables quick and easy creation of price quotations for HPE networking products
HPE Source	helps with determining the correct HPE networking product based on specific requirements
HPE Switch Selector	an HPE-hosted webstore for partners based on an order management system
HPE Networking Online Configurator	an HPE-hosted web application with pre-approved pricing
HPE PartSurfer	tool that provides fast easy access to service parts information for a wide range of HPE products

Correct Answer:

Configuration tool	Description
HPE Networking Online Configurator	enables quick and easy creation of price quotations for HPE networking products
HPE Switch Selector	helps with determining the correct HPE networking product based on specific requirements
HPE Source	an HPE-hosted webstore for partners based on an order management system
HPE Elite	an HPE-hosted web application with pre-approved pricing
HPE PartSurfer	tool that provides fast easy access to service parts information for a wide range of HPE products

QUESTION 14

Memory type	Memory description
RDIMM	provides advanced error detection and memory register support
LRDIMM	isolates the electrical loading of the DRAM from the system to allow for faster operation
UDIMM	allows for performance optimization and configuration agility
NVDIMM	provides smaller capacity and basic error -correcting code

Click and drag the business challenge on the left to match it with competitive advantage provided by implementing a hybrid infrastructure on the right.

Select and Place:

Business challenge	Competitive Advantage
Inefficient operations	agile and flexible
Locked in by legacy investment	simple and initiative
Rigid IT environments	workload optimized
Technical and organizational silos	flexible investments

Correct Answer:

QUESTION 15

A customer needs to consolidate its standard server SAN- and LAN-based infrastructure to a blade enclosure converged-based solution.

Which components should the architect include in the proposal to help meet the customer's needs? (Select two.)

- A. HPE Flex Fabric 20/40 FB Virtual Connection module
- B. HPE 6125XLG Ethernet Switch
- C. HPE Insight Remote Support
- D. HPE OneView
- E. HPE 8Gb Fibre Channel Switch

Correct Answer: CD
