B. the default address book entry of "any" in the external zone

C. an address book entry for the address to be translated in the internal zone

D. a static route to the appropriate subnet using a private interface as the outbound interface

Correct Answer: CD

QUESTION 13

Assuming factory default settings, which statement describes the minimum requirements for WebUI management access?

A. Connect a PC addressed on the 192.168.1.0 subnet to any interface, open a browser and access

192.168.1.1

B. Terminate the bootup sequence from the console device, open a browser on the console device and access 192.168.1.1

C. Connect a PC addressed on the 192.168.1.0 subnet to the product-specific interface for the device, open a browser and access 192.168.1.1

D. Using the CLI, define an IP address on a physical interface, connect a PC to the interface and open a browser to the interface address.

Correct Answer: C

QUESTION 14

Which process describes how an addressed physical interface is moved into a Layer 2 zone?

A. Place the required interface into the VLAN zone.

B. Place the required interface into L2 zones such as V1-Trust, V1-Untrust

C. Remove the interface from the L3 zone such as Trust and place it into an L2 zone such as V1-Trust

D. Remove the address from the interface, remove the interface from the L3 zone, and then place interface in the L2 zone.

Correct Answer: D

QUESTION 15

-- Exhibit -
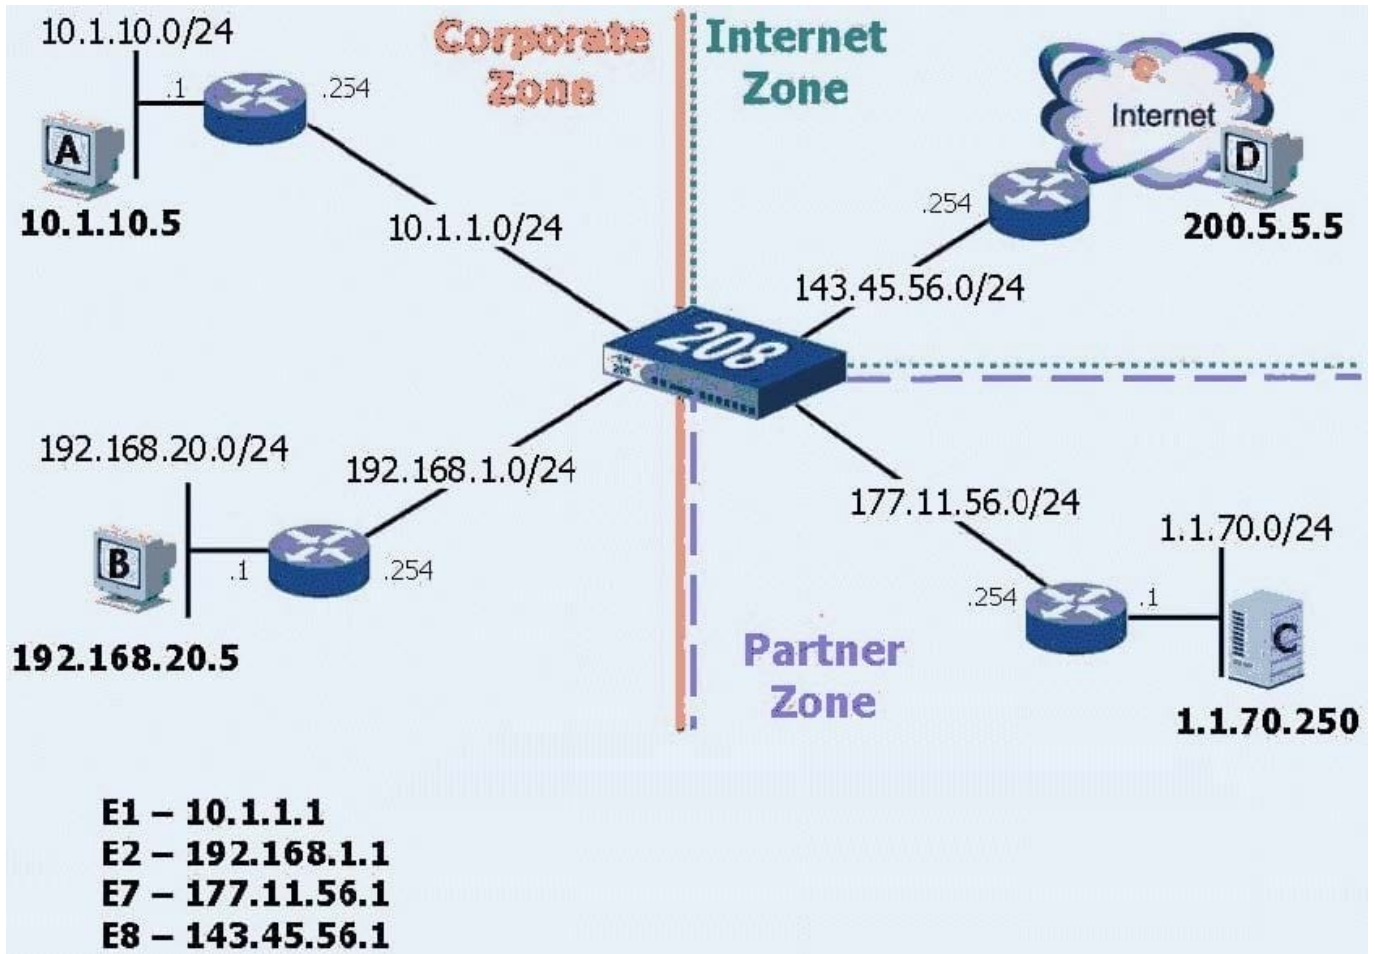

-- Exhibit -Click the Exhibit button to view the exhibit.

Review the exhibit. What would be the best routing command to allow host A to communicate with host B?

(Assume a route from the 208 to Host A\\'s subnet already exists.)

A. set route0.0.0.0/0 int e2 gateway 192.168.1.254

B. set route 192.168.20.0 interface e1 gateway 192.168.1.254

C. configure route192.168.20.0/24 gateway 192.168.1.254 int e2

D. set route 192.168.20.0/24 interface e2 gateway 192.168.1.254

Correct Answer: D
