QUESTION 1

You need to define Margie's Travel legal entity and tenant structure in the solution blueprint. What should you define?

- A. Three tenants with each tenant containing one legal entity.
- B. One tenant with each country configured as a separate legal entity.
- C. Three tenants with each country configured as a separate legal entity.
- D. One tenant for US and UK as separate legal entities. One tenant for Jamaica with one legal entity.

Correct Answer: D

Margie's created a second company based in Jamaica, followed by the acquisition of a third company in the United Kingdom (UK).

All three countries must use Dynamics 365 Finance.

Margie's Travel wants to enable customer self-service in the future for customers based in the US and UK.

QUESTION 2

HOTSPOT

You need to determine an infrastructure for the solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Hardware

	▼
Laptops and credit card readers only	
Warehouse mobile devices and laptops only	
Warehouse mobile devices, laptops, and a store database	
Warehouse mobile devices, laptops, and other peripheral devices.	

Apps and Services

	▼
Common Data Model and Common Data Service	
FTP Server	

Correct Answer:

Hardware

	▼
Laptops and credit card readers only	
Warehouse mobile devices and laptops only	
Warehouse mobile devices, laptops, and a store database	
Warehouse mobile devices, laptops, and other peripheral devices.	

Apps and Services

	▼
Common Data Model and Common Data Service	
FTP Server	

QUESTION 3

DRAG DROP

A company plans to use Dynamics 365 finance and operations apps.

Code builds for new development must follow Microsoft's recommendations by using supported tools.

Virtual machine (VM) environments are required for the following usage:

1.

Develop code.

2.

Centrally merge all code in a structured way.

You need to implement a code management solution.

Which tools should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Tools

- Lifecycle Services (LCS)
- Azure DevOps
- Git
- Azure portal

Answer Area

Requirement

Deploy developer VMs.

Tool

Keep developer VMs updated with the latest code.

Tool

Deploy new code to the build environment.

Tool

Correct Answer:

Tools

-
-
-
- Azure portal

Answer Area

Requirement

Deploy developer VMs.

Lifecycle Services (LCS)

Keep developer VMs updated with the latest code.

Azure DevOps

Deploy new code to the build environment.

Git

Box 1: Lifecycle Services (LCS)

Deploying cloud development environments

To deploy a cloud development environment in your LCS project:

Create a connection between an LCS project and your Azure subscription. You will need your Azure subscription ID and

authorize the use of the subscription.

Select + under Environments to deploy.

Select an application and platform version.

Select an environment topology. For more information, see Sign up for preview subscriptions.

If you chose a cloud-hosted environment, select which Azure connector you want to use. Then select Deploy.

Box 2: Azure DevOps

Azure DevOps provides developer services for allowing teams to plan work, collaborate on code development, and build and deploy applications. Azure DevOps supports a collaborative culture and set of processes that bring together

developers, project managers, and contributors to develop software.

Box 3: Git

Git is a DevOps tool used for source code management. It is a free and open-source version control system used to handle small to very large projects efficiently. Git is used to tracking changes in the source code, enabling multiple

developers to work together on non- linear development.

QUESTION 4

DRAG DROP

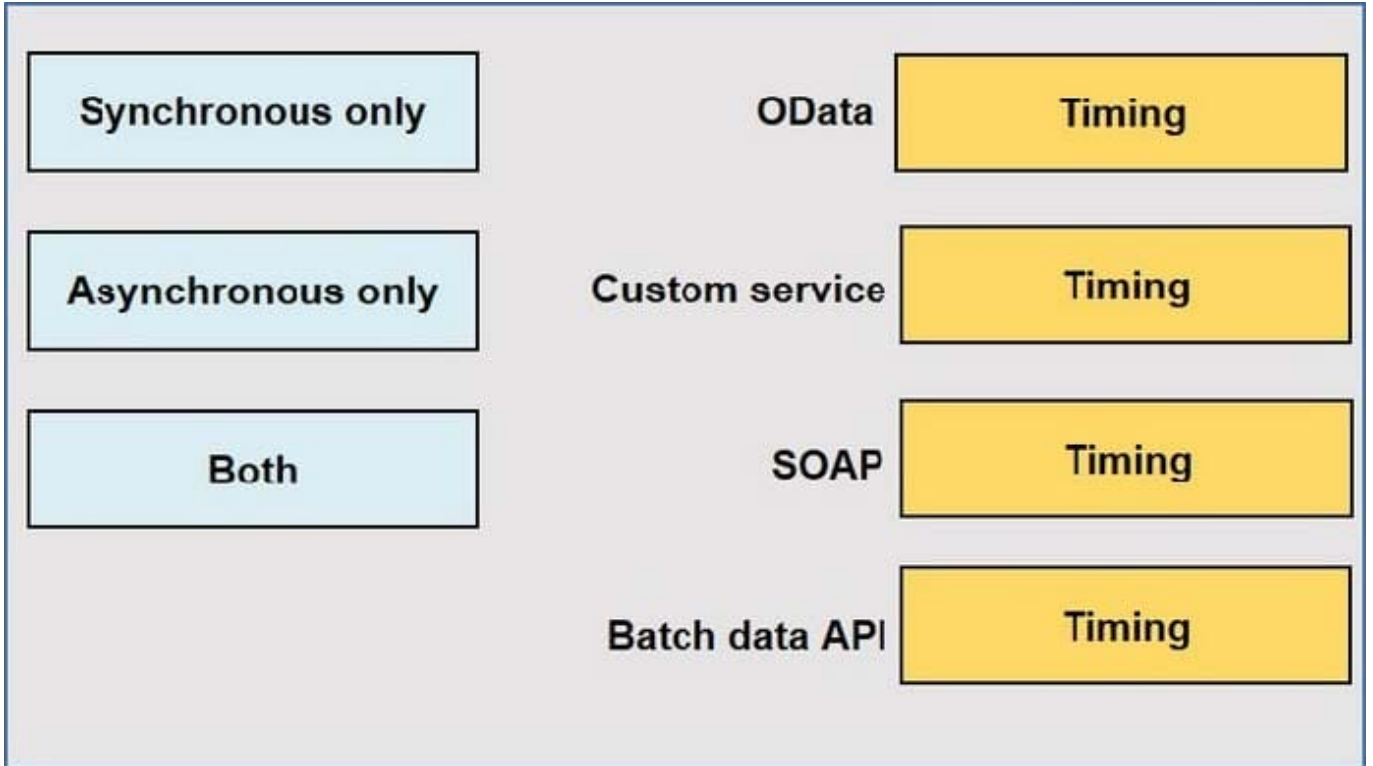

You are designing a solution for a company. The solution will integrate with various data sources.

You need to recommend the correct timing for each integration pattern.

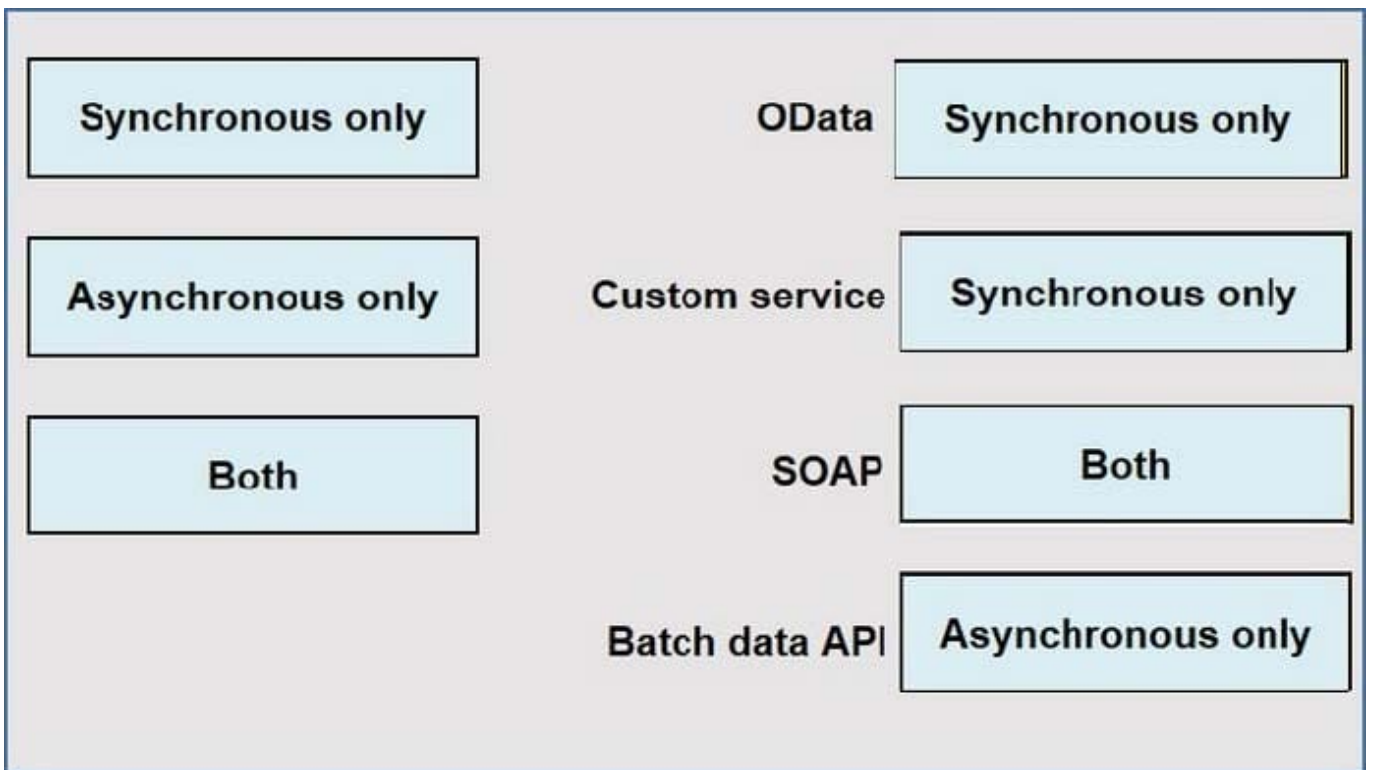

What should you recommend? To answer, drag the appropriate timings to the correct patterns. Each timing may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Correct Answer:

Reference: <https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/data-entities/integration-overview>

QUESTION 5

HOTSPOT

A company is determining which reporting tools to use as part of a Dynamics 365 Finance implementation.

1.

Scenario A: Power users must use a free form tool to allow other power users to leverage transactional data to be consumed externally.

2.

Scenario B: Developers must use a modeling tool to allow all users to leverage aggregated data to be consumed internally.

3.

Scenario C: Developers must a free form tool to allow all users to leverage transactional and aggregated data to be consumed internally and externally.

4.

Scenario D: Power users must use a free form tool to allow all users to leverage aggregated data to be consumed internally and externally.

5.

Scenario E: Power users must use a modeling tool to allow other power users to leverage transactional data to be consumed externally.

You need to recommend which tool should be used for each scenario.

Which tool should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Scenario	Reporting Tool
A	<input type="text"/>
	Microsoft Excel
	Embedded BI
	SSRS report
	Power BI
	Management reporter
B	<input type="text"/>
	Microsoft Excel
	Embedded BI
	SSRS report
	Power BI
	Management reporter
C	<input type="text"/>
	Microsoft Excel
	Embedded BI
	SSRS report
	Power BI
	Management reporter
D	<input type="text"/>
	Microsoft Excel
	Embedded BI
	SSRS report
	Power BI
	Management reporter
E	<input type="text"/>
	Microsoft Excel
	Embedded BI
	SSRS report
	Power BI
	Management reporter

Correct Answer:

Answer Area

Scenario	Reporting Tool
A	<input type="text"/>
	Microsoft Excel
	Embedded BI
	SSRS report
	Power BI
	Management reporter
B	<input type="text"/>
	Microsoft Excel
	Embedded BI
	SSRS report
	Power BI
	Management reporter
C	<input type="text"/>
	Microsoft Excel
	Embedded BI
	SSRS report
	Power BI
	Management reporter
D	<input type="text"/>
	Microsoft Excel
	Embedded BI
	SSRS report
	Power BI
	Management reporter
E	<input type="text"/>
	Microsoft Excel
	Embedded BI
	SSRS report
	Power BI
	Management reporter

QUESTION 6

DRAG DROP

A company implements Dynamics 365 Finance. The company does not have a developer on staff.

The company designs vendor checks that will be accepted by banks. The company wants to format new vendor checks for multiple banks.

You need to recommend a solution to validate that a generated vendor check format matches the original check format.

What should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Tools

- Document management
- Business documents
- SQL Server Reporting Services (SSRS)
- Electronic reporting

Answer Area

Requirement

Format new vendor checks.

Validate vendor check formats.

Tool

Tool
Tool

Correct Answer:

Tools

Business documents
SQL Server Reporting Services (SSRS)

Answer Area

Requirement

Format new vendor checks.
Validate vendor check formats.

Tool

Electronic reporting
Document management

Box 1: Electronic reporting You can use Electronic reporting (ER) to format vendor checks. Many bank-specific and check provider ecific check formats are available on the market. Sample check formats have been included in the Payment check model in the ER tool repository. These sample checks are labeled Check in the middle (US) and Check on top stub below (US).

Box 2: Document management Business document management is built on top of the ER framework and enables business users to edit business document templates by using Microsoft 365 service or appropriate Microsoft Office desktop application. Edits to the documents might include changing business document designs and adding placeholders for additional data without source code changes and new deployments. No knowledge of the ER framework is required to update templates of business documents.

QUESTION 7

DRAG DROP

A client is implementing Dynamics 365.

The client is exploring the available testing options.

You need to recommend which tool should be used based on the requirement.

What should you recommend? To answer, drag the appropriate types to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Types	Answer Area	Type
Standard test case	Requirement Must pass values from one test to the next in sequence	Type
Chain test case	Execute the same test process with different variables	Type
Derived test case		

Correct Answer:

Types	Answer Area	Type
Standard test case	Requirement Must pass values from one test to the next in sequence	Chain test case
	Execute the same test process with different variables	Derived test case

Reference: <https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/perf-test/rsat/rsat-chain-test-cases>
<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/perf-test/rsat/rsat-derived-test-cases>

QUESTION 8

DRAG DROP

A company is implementing Dynamics 365 and requires extensive data and end-to-end testing during each iteration.

You need to determine a testing strategy for multiple scenarios.

What should you recommend? To answer, drag the appropriate tools to the correct scenarios. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Tools

- RSAT
- Acceptance test library
- SysTest
- Data task automation

Answer Area

Scenario	Tool
Record business tasks and convert them into a suite of automated tests.	Tool
Data setup, integration, and components validation testing.	Tool
Automation advanced test requirements and random data generation.	Tool
Automate the creation and configuration of data projects.	Tool

Correct Answer:

Tools

Answer Area

Scenario	Tool
Record business tasks and convert them into a suite of automated tests.	RSAT
Data setup, integration, and components validation testing.	Acceptance test library
Automation advanced test requirements and random data generation.	SysTest
Automate the creation and configuration of data projects.	Data task automation

QUESTION 9

A company plans to implement Dynamics 365 Finance.

The company's current system contains sales tax-related data.

You need to design a solution that sequences the transfer of sales tax codes and sales tax groups. What should you do?

- A. Design a data migration scenario.
- B. Write customization requirements.
- C. Analyze data integration points.
- D. Design user acceptance testing processes.

Correct Answer: A

QUESTION 10

A company uses Dynamics 365 Finance.

Which environment or environments are eligible for continuous updates?

- A. All sandbox, development, and production environments are eligible for continuous updates.
- B. All sandbox environments and the production environment are eligible for continuous updates.
- C. Only the production environment and one sandbox environment are eligible for continuous updates.
- D. Only the production environment is eligible for continuous updates.

Correct Answer: B

Reference: <https://www.sikich.com/insight/dynamics-365-update-policy/>

QUESTION 11

HOTSPOT

A company deploys Dynamics 365 finance and operations apps. The implementation includes Dynamics 365 and Microsoft Power Platform solutions. The company creates and manages service calls for technicians by using Dynamics 365 Field Service.

When a work order is created, Dynamics 365 Field Service must create a sales order for that work order in real time.

A user creates a change-based alert that will trigger when a newly created sales order from a workflow is greater than \$5,000. The alert must trigger a workflow the user can modify to automate other steps.

You need to recommend components for the company to use.

NOTE: Each correct selection is worth one point.

Hot Area:

Action

Integration component

Create the sales order from the work order.

Dual-write
Custom service
Batch OData API

Trigger the change-based alert workflow.

Activities
Dual-write
Business events
Data Integrator

Correct Answer:

Action

Integration component

Create the sales order from the work order.

Dual-write
Custom service
Batch OData API

Trigger the change-based alert workflow.

Activities
Dual-write
Business events
Data Integrator

Box 1: Dual-write

When a work order is created, Dynamics 365 Field Service must create a sales order for that work order in real time.

Integrate Dynamics 365 Field Service and Supply Chain Management How it works

The integration is made possible because Field Service is built on top of Common Data Service and dual-write, which writes changes in Dynamics 365 Supply Chain Management to Common Data Service and vice versa.

After dual-write is enabled, a solution is imported into Field Service that adds the required fields to make the entities in each system integratable.

Box 2: Business events

A user creates a change-based alert that will trigger when a newly created sales order from a workflow is greater than \$5,000. The alert must trigger a workflow the user can modify to automate other steps.

Business events provide a mechanism that lets external systems receive notifications from finance and operations applications. In this way, the systems can perform business actions in response to the business events.

Business events occur when a business process is run. During a business process, users who participate in it perform business actions to complete the tasks that make up the business process.

A business action that a user performs can be either a workflow action or a non-workflow action. Approval of a purchase requisition is an example of a workflow action, whereas confirmation of a purchase order is an example of a nonworkflow action. Both types of actions can generate business events that external systems can use in integration and notification scenarios.

QUESTION 12

An organization is implementing Dynamics 365 Finance.

The organization uses financial reports including detailed balance information in local currencies for all accounts. Reports must include general ledger account number and journal entry line description.

You need to recommend a report that meets the requirements.

Which report should you recommend?

- A. Audit Details
- B. Summary Trial Balance
- C. Balance Sheet
- D. Cash Flow

Correct Answer: A

QUESTION 13

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is planning to implement Dynamics 365 Supply Chain Management with three locations. Two locations must use United States currency (USD) as the default currency. The third location must use Canadian currency (CAD).

One US facility and the Canadian facility must use advanced warehouse functionality. The other US facility must use basic warehousing.

You need to configure the legal entity, site, and warehouse architecture to meet the requirements.

Solution: Create two legal entities, one for the US facilities and one for the Canadian facility.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: A

Reference: <https://stoneridgesoftware.com/warehouse-management-options-dynamics-365-operations/>

QUESTION 14

DRAG DROP

A company plans to implement Dynamics 365 Supply Chain Management.

You are a solution architect and need to prepare a Solution Blueprint document for this implementation.

You need to classify the requirements by type.

What is the classification for each requirement? To answer, drag the appropriate classifications to the correct requirements. Each classification may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Select and Place:

Classifications

Functional

Non-functional

Answer Area

Requirement

Evaluate system performance.

Convert a quote to a sales order.

Update an environment.

Classification

Classification

Classification

Classification

Correct Answer:

Classifications

- Functional
- Non-functional

Answer Area

- Requirement**
- Evaluate system performance.
 - Convert a quote to a sales order.
 - Update an environment.

Classification

- Non-functional
- Functional
- Non-functional

Box 1: Non-functional

Requirements are commonly referred to as either functional or non-functional. Functional requirements describe what the solution needs to do or its behaviors, and non-functional requirements commonly describe non-behavior aspects of the

solution such as performance requirements.

The following examples are of well-composed non-functional requirements:

Average screen load time for internal users that are not mobile will be less than three seconds.

External portal must be able to handle 100 concurrent users who are performing case submission.

Any credit card number that is used cannot be stored in Common Data Service environment.

Box 2: Functional

Example functional requirements

The following scenarios describe simple examples of functional requirements:

As a sales user, I need to be able to close an opportunity as lost and then capture why it was lost so that we can improve our sales tactics in the future.

As a sales manager, I need to be able to approve a discount on a quote so that I can reduce the total price and give a discount to the customer.

As a staff accountant, I want to be prevented from closing a batch that has pending items so that I do not have to reopen it later.

Box 3: Non-functional

Examples of common non-functional requirement types include: Availability Compliance/regulatory * -> Data retention/residency Performance (response time, and so on) Privacy Recovery time Security Scalability

QUESTION 15

HOTSPOT

You need to recommend which type of Dynamics 365 licenses are needed.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Users

Recommendation

COO

Base licenses only
Base, Finance, and Supply Chain Management licenses
Base and Finance licenses
Base and Supply Chain Management licenses

Warehouse employees

Base licenses only
Base, Finance, and Supply Chain Management licenses
Base and Finance licenses
Base and Supply Chain Management licenses

Tasting room employees

Base and Supply Chain Management licenses
Base, Finance, and Supply Chain Management licenses
Base, Supply Chain Management, and Retail licenses
Base and Sale Professional licenses

Mobile scanner users

Base and Supply Chain Management licenses
Base, Finance, and Supply Chain Management licenses
Device licenses
Named User licenses

Correct Answer:

Answer Area

Users

Recommendation

COO

Base licenses only
Base, Finance, and Supply Chain Management licenses
Base and Finance licenses
Base and Supply Chain Management licenses

Warehouse employees

Base licenses only
Base, Finance, and Supply Chain Management licenses
Base and Finance licenses
Base and Supply Chain Management licenses

Tasting room employees

Base and Supply Chain Management licenses
Base, Finance, and Supply Chain Management licenses
Base, Supply Chain Management, and Retail licenses
Base and Sale Professional licenses

Mobile scanner users

Base and Supply Chain Management licenses
Base, Finance, and Supply Chain Management licenses
Device licenses
Named User licenses

Box 1: Base, Finance, and Supply Chain Management licenses

Only the President/CEO, CFO, COO, Controller and VP Operations users must be able to access finance and warehouse features.

Box 2: Base and Supply Chain Management licenses.

Warehouse users must only have access to warehouse function. All other users must have access to finance functions.

Box 3: Base and Sale Professional licenses

The company holds events for club members in the tasting room and ships both full cases and individual bottles to

members. The tasting room is not treated as a retail store. All sales to club members only and purchases must be made on-

account.

The tasting room will not have mobile scanners.

Box 4: Device licenses

The distribution center must have mobile scanners for the warehouse.
