

NS0-526^{Q&As}

NetApp Certified Implementation Engineer - Data Protection

Pass NCIE-Data Protection NS0-526 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.pass2lead.com/ns0-526.html>

100% Passing Guarantee
100% Money Back Assurance

Following Questions and Answers are all new published by NCIE-Data Protection Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

You and other administrators are in the habit of creating FlexClone LUNs and then not deleting them when they are no longer needed. What should you do to help manage space utilization?

- A. Use the flexclone split command.
- B. Use the volume snapshot autodelete modify command.
- C. Configure FlexClone LUNs to automatically be marked for deletion.
- D. Configure FlexClone LUNs to automatically delete when they are one minute older than 30 days.

Correct Answer: B

QUESTION 2

You are calculating transfer time for SnapMirror replication between two NetApp clusters. Which three factors should be included in your consideration?

(Choose three.)

- A. data size to transfer
- B. SnapMirror schedule
- C. TCP window size
- D. latency between clusters
- E. retention policy

Correct Answer: ACD

QUESTION 3

You are in a SnapProtect v11 solution environment creating a new subclient with NAS data

- A. Besides the subclient name, what other information is mandatory? (Choose three.)
- B. the Snap Engine
- C. the backup content path
- D. the storage policy
- E. the backup schedule
- F. the retention policy

Correct Answer: ACD

QUESTION 4

Your customer wants to implement a SnapVault relationship, but is concerned that the initial transfer will use up all of their network bandwidth. Which solution should you recommend to the customer?

- A. Use the SMTape functionality to back up the source volume to tape and use the tape to transfer the base snapshot copy to the destination volume.
- B. Set up a SyncMirror relationship to a NetApp controller in the same data center, then ship the controller to the destination site.
- C. Manually copy each directory from the source volume to the destination volume during times when the network utilization is low.
- D. Enable volume efficiency on the destination volume.

Correct Answer: A

QUESTION 5

A customer wants to set up an SVM DR relationship to protect a source SVM that is dedicated for NAS file services. The source and destination clusters are running ONTAP 9.5.

In this scenario, which application accomplishes this task?

- A. OnCommand Unified Manager
- B. OnCommand System Manager
- C. SnapCenter
- D. Snap Creator

Correct Answer: B

QUESTION 6

A company is evaluating different data protection solutions. The company requires a solution that provides both local failover and storage tiering.

Which two solutions meet these requirements? (Choose two.)

- A. a FAS9000A system with SSD aggregates and FabricPool
- B. a FAS8200A NetApp Private Storage (NPS) system and Cloud Backup
- C. an AFF A300A with StorageGRID WebScale
- D. a FAS2650A system with HDD aggregates and FabricPool

Correct Answer: AC

QUESTION 7

Your customer has issued the metrocluster heal command. Which two statements are true regarding this command?

(Choose two.)

- A. The customer has replaced failed disks in one of the clusternodes.
- B. The customer has to run the command twice.
- C. The customer has one node in the site down and wants to heal the cluster.
- D. The customer is preparing for a disaster recovery switchback.

Correct Answer: AD

QUESTION 8

You have a NAS volume containing 100 GB of data and daily change rate of 10%. You want to keep seven daily Snapshot copies. What is the minimum size for the volume?

- A. 170 GB
- B. 100 GB
- C. 110 GB
- D. 220 GB

Correct Answer: A

QUESTION 9

Which two NetApp products reduce the backup time and create a consistent backup for a primary Oracle target?

(Choose two.)

- A. SnapMirror for Open Systems
- B. Open Systems SnapVault
- C. SnapManager for Oracle
- D. SnapProtect

Correct Answer: CD

QUESTION 10

A customer has a MetroCluster solution and wants to automate the disaster-recovery process. The customer wants to control the switchover between the sites. Which NetApp tool would satisfy these requirements?

- A. OnCommand Unified Manager
- B. MetroCluster Tiebreaker
- C. OnCommand System Manager
- D. OnCommand SnapCenter

Correct Answer: B

QUESTION 11

Which attribute does Data ONTAP use to identify Snapshot copies between primary and secondary FlexVol volumes in a SnapVault relationship?

- A. FlexVol name
- B. Snapshot prefix
- C. SnapMirror policy
- D. SnapMirror label

Correct Answer: D

QUESTION 12

Your customer wants to implement SVM DR, but the customer is not certain whether the identity-preserve parameter should be enabled. The customer explains that the source and destination clusters are in different network subnets.

In this scenario, which SVM DR solution should the customer use?

- A. SVM DR using the identity-preserve parameter disabled and the default SnapMirror policy.
- B. SVM DR using the identity-preserve parameter enabled and then administratively take the data LIFs offline on the DR cluster.
- C. SVM DR with the identity-preserve parameter enabled and a SnapMirror policy with the discard-configs network parameter.
- D. SVM DR with the identity-preserve parameter enabled and the default SnapMirror policy.

Correct Answer: D

QUESTION 13

Your disaster recovery strategy requires a mirror, an archive, and a tape backup. Which software would you recommend for this scenario?

- A. OnCommand System Manager
- B. OnCommand Workflow Automation
- C. SnapProtect
- D. OnCommand Unified Manager

Correct Answer: C

QUESTION 14

You have multiple load-sharing destinations for a volume in a storage virtual machine. The source volume has become unavailable and you want to make one of the destination volumes the new source.

What happens to the original source volume?

- A. The promote operation deletes the original source volume.
- B. The promoteoperation takes the original source volume offline.
- C. The initialize operation deletes the original source volume.
- D. The original source volume goes offline.

Correct Answer: A

QUESTION 15

A customer has deployed OnCommand Unified Manager and wants to use it to manage their data protection relationships within their NetApp storage infrastructure.

In this scenario, which additional component must be deployed to satisfy this requirement?

- A. OnCommand System Manager
- B. NetApp SnapCenter
- C. OnCommand Cloud Manager
- D. OnCommand Workflow Automation

Correct Answer: D
