QUESTION 1

Identify two options for passing data between a Pega application and a webpage containing a web mashup. (Choose Two)

- A. Call the function `pega.web.api.doAction()`
- B. Call a Pega API function from the host server
- C. Use REST methods to call Pega microservices
- D. Use the attribute `data-pega-event-onpagedata`

Correct Answer: AD

QUESTION 2

A medium-size toymaker wants to fulfill orders received during the peak season in December and process the orders in batches multiple times a day.

How do you implement this use case?

- A. Create one scheduled job and set its run schedule to multiple times a day.
- B. Create scheduled jobs, one for each run, that can process accumulated orders.
- C. Create batches of orders and send each batch for processing when it gets full.
- D. Create a queue processor that can process orders received by the company.

Correct Answer: A

QUESTION 3

You want to create a new minor version of an application ruleset to add a new feature to your application. The new feature will be made available to users in a phased rollout.

How do you update the application to add the new ruleset version?

- A. Create a branch ruleset and a new application, and add the branch ruleset to the application.
- B. Lock and roll the existing ruleset, and create a new application version.
- C. Lock and roll the existing ruleset, and update the existing application version.
- D. Create a new application version and add the new ruleset version as a production ruleset.

Correct Answer: C

QUESTION 4

A class group is used to _____.

- A. identify a layer of the Enterprise Class Structure
- B. combine related properties by usage
- C. assign work to a specific group of users
- D. associate child classes with a single database table

Correct Answer: A

QUESTION 5

A travel reservation servicing case includes a service level for responding to requests. The service level intervals vary according to passenger status, class of service, and fare type. Which implementation satisfies this requirement?

- A. Create a multivariate circumstanced rule and a when rule.
- B. Create a multivariate circumstanced rule, a circumstance definition, and a circumstance template.
- C. Create a single property circumstanced rule and a when rule.
- D. Create a single property circumstanced rule.

Correct Answer: B

QUESTION 6

You are updating a system of record using a SOAP connector. If the system of record is unavailable, you want to retry after an hour. If it is still unavailable after an hour, a notification should be sent to a system administrator.

How do you implement this requirement?

- A. Implement the logic in the data page's response data transform.
- B. Implement the logic in the connector's error handler flow.
- C. Customize the standard pxErrorHandlingTemplate data transform.
- D. Use a transition condition in the activity step invoking the connector.

Correct Answer: B

QUESTION 7

A user reports that an application takes five seconds to complete a step and present the next step in a process. Which tool allows you to gather and analyze performance data for the form submission?

- A. Performance Profiler
- B. Performance Analyzer (PAL)
- C. Database Trace
- D. Tracer

Correct Answer: B

QUESTION 8

What two actions must you perform to create a class join in a report definition? (Choose Two)

- A. Select the type of match for key values.
- B. Add an association rule to match key values.
- C. Create a prefix for the joined class.
- D. Add a parameter for each property in the class you want to join.

Correct Answer: AC

QUESTION 9

What is the function of class mapping for reports?

- A. Ensure all data from one report belongs to a single Case type instance.
- B. Create a new Database table record for a Pega Platform class.
- C. Assign an ID to a class so reports can reference specific properties.
- D. Retrieve data from an associated database table.

Correct Answer: D

QUESTION 10

Which two configurations are required when adding a Split for Each shape to your case life cycle? (Choose Two)

- A. Enter a rule that stores the audit note that you want to include in the subprocess
- B. Define when the parent process resumes processing
- C. Enter the Page List or Page Group property that is the basis of the split
- D. Enable users to get back to the subprocess after the case moves forward

Correct Answer: AB

QUESTION 11

Graduate school students create and submit project proposals to their advisors. During the proposal phase, the advisor and the student can each edit the draft proposal.

How do you ensure the advisor and the student can simultaneously edit the proposal, and the application can check the proposal for changes before committing them?

- A. Configure the locking on the case type to allow one user.
- B. Configure the locking on the case type to allow multiple users.
- C. Configure an assignment for the advisor and an assignment for the student.
- D. Configure the student and advisor roles with view and edit permission.

Correct Answer: B

QUESTION 12

What is the purpose of the Policy Verification landing page when configuring a security solution in Pega Platform?

- A. To test if a user has the required access to a case
- B. To manually authenticate a specific user on an integrated external database
- C. To test if a user's channel-specific password meets defined property requirements
- D. To configure mapping of access control attributes

Correct Answer: A

QUESTION 13

DRAG DROP

In the Answer Area, drag each log name on the left to its intended purpose on the right.

Select and Place:

Log Name

Alert
Pega
AlertSecurity

Answer Area

Log Name

Intended Purpose

Contains warnings, errors, and information messages about internal operations
