QUESTION 1

A domain user is granted access and could successfully log into the hub yesterday. The same domain user attempts to log in into the hub today, and receives this error message:

Your account is inactive. Contact your administrator to activate it.

The user is able to successfully log into the Windows domain network. The user did NOT change the password recently. The user has NO limited working hours in the Active Directory.

What should the system administrator investigate to determine the cause of this error message?

- A. The user properties in the QMC
- B. The Qlik Sense proxy logs
- C. The security rules which impact the user
- D. The Windows event viewer

Correct Answer: A

QUESTION 2

A system administrator has to set up three physical servers and one virtual server for a new Qlik Sense Enterprise environment. Four separate nodes are required.

The physical servers have 32 GB of RAM. The virtual server has 8 GB of RAM.

Which node should be virtualized?

- A. Proxy
- B. Scheduler/Reload
- C. Central
- D. Engine

Correct Answer: D

QUESTION 3

A company recently experienced a merger and needs to integrate new users into the Qlik Sense environment.

A system administrator must make sure that the system sizing and the tokens match the requirements for all employees in the future.

The system administrator learns the following information: 450 active Qlik Sense users before the merger 300 new Qlik

Sense users 500 current token licenses Reloads must have the same performance as before the merger The number of apps will approximately double

Management requests an estimate from the system administrator about server resources and additional licenses.

Which set of tools should the system administrator use to meet these requirements?

- A. Performance Monitor, Reloads Monitor, Scalability Tools, and License Monitor
- B. Performance Monitor, License Monitor, Operations Monitor, and Scalability Tools
- C. Performance Monitor, Reloads Monitor, QlikCockpit, and License Monitor
- D. Performance Monitor, Reloads Monitor, Operations Monitor, and Scalability Tools

Correct Answer: B

QUESTION 4

A system administrator needs to complete the configuration of a Qlik Sense Enterprise environment. The customer solution that needs to access Qlik Sense resources is a JavaScript app which must be authenticated through single sign-on. The customer provides a public key to the system administrator. Qlik Sense is expecting an RSA signature with SHA256.

Which authentication method should the system administrator use?

- A. SAML
- B. JWT
- C. Header
- D. Ticket

Correct Answer: A

QUESTION 5

A Qlik Sense deployment is planned for 200 users initially. Within a year, the number of users will grow to 2000, with over 100 apps. Most of these users will be within the organization's firewall. There are plans to eventually allow access to some apps to users outside the firewall.

Which two deployment models will ensure secure access to Qlik Sense apps by authorized users outside the firewall? (Choose two.)

- A. Deploy a reverse proxy in the DMZ and configure it to forward all Qlik Sense traffic to the Qlik Sense servers on the corporate network.
 - B. Enable all external users to connect to the corporate network via a secure VPN to access Qlik Sense apps.
-

- C. Deploy Qlik Sense in the DMZ and open all required ports to internal and external users.
- D. Deploy Qlik Sense in the corporate network, open all required firewall ports, and allow external users to access apps directly.
- E. Configure Qlik Sense in "off-line mode" for external users and allow them to access apps locally.

Correct Answer: BD

QUESTION 6

In a Qlik Sense environment, users in the Finance department can successfully log in to the hub open or edit apps in the Finance stream.

Developers in the Finance department are unable to modify the HTML code for widgets.

Where should the system administrator determine the source of this issue?

- A. In Audit, select Content libraries as target resource, filter by Group, and select Hub as the environment
- B. In Audit, select Extension as target resource, filter by Blocked, and select Hub as the environment
- C. In Audit, select App objects as target resource, filter by User directory, and select Hub as the environment
- D. In Audit, select Extension as target resource, filter by Group, and select Hub as the environment

Correct Answer: A

QUESTION 7

A system administrator must make sure that only members of the "Dev" Active Directory group have the Work stream and are able to create Qlik Sense apps.

The administrator creates a security rule that only allows members of the "Dev" group to create apps, but other users can still see the Personal Work area and are able to create apps.

What is the cause of this issue?

- A. The security rules are corrupted
- B. The default security rule for app creation is enabled
- C. The Create app functionality is disabled for "Dev" group
- D. Security rules do NOT impact the Work stream

Correct Answer: A

QUESTION 8

A user owns an app that was previously published and wants to delete the app in the hub. The user is NOT able to

delete the app.

What could be causing this issue?

- A. The app is open and is being accessed by another user
- B. Published apps can only be deleted from the QMC
- C. The user needs to be assigned the RootAdmin role
- D. The user needs to be assigned the ContentAdmin role

Correct Answer: B

QUESTION 9

A system administrator is installing and configuring a new Qlik Sense deployment. The system administrator completes the following steps: Makes sure the IT-provisioned server, named Server1, meets the required specifications Installs Qlik Sense on Server1 Tests the installation by opening Qlik Sense from the server desktop shortcut Modifies default virtual proxy prefix to "qliksense" Creates a new virtual proxy for users with a prefix of "QSE" Links the new virtual proxy to the central proxy Configures the new virtual proxy to load balance with the central node Configures the new virtual proxy host white list with the server name, FQDN, and server IP address

When the system administrator tests the new virtual proxy using the URL, <http://Server1/sense/hub>, this error message displays:

Error 404 The requested resource cannot be found

What is causing this error?

- A. The new central proxy was NOT created
- B. The incorrect virtual proxy was used in the test
- C. The new virtual proxy is configured incorrectly
- D. The central proxy was NOT configured correctly

Correct Answer: C

QUESTION 10

A system administrator needs to upgrade the environment to the latest version of Qlik Sense Enterprise and decides to create a backup.

Which three items should the administrator back up? (Choose three.)

- A. Qlik Sense certificates

- B. Qlik Sense Repository Database
- C. Qlik Sense ProgramData files
- D. Shared persistence file share
- E. Qlik Sense apps

Correct Answer: ABD
