QUESTION 1

SOAP messages contain headers that can be customized but are also used to implement industry-standard features provided by technologies, such as WS-Addressing. Select the correct answer.

- A. True
- B. False

Correct Answer: A

QUESTION 2

Which of the following statements makes sense? Select the correct answer.

- A. I discovered the service I was looking for by using WS-Addressing to issue service search queries.
- B. I discovered the service I was looking for by building a WS-BPEL process definition.
- C. I discovered the service I was looking for by searching the UDDI-compliant service registry.
- D. None of these statements make sense.

Correct Answer: C

QUESTION 3

When two compatible SOAP-based Web services need to exchange an XML document that is compliant with the XML schema shared by both services, then: Select the correct answer.

- A. A data model transformation technology, such as XSLT, must be used to enable the data exchange.
- B. A new XML schema must be created to overcome the disparity between how each service defines the data model for the XML document.
- C. A WS-Policy definition must be created to establish rules that address any differences in the XML document exchange.
- D. None of the above.

Correct Answer: D

QUESTION 4

Which of the following statements is true? Select the correct answer.

- A. A service enters the service provider role when it initiates contact with other services, including those that act as intermediaries.

- B. A service enters the service provider role when it initiates contact with intermediaries only.
- C. A service enters the service provider role when it is accessed by other service consumers, including intermediaries.
- D. A service enters the service provider role when it is accessed by intermediaries only.

Correct Answer: C

QUESTION 5

The acronym SOAP was originally defined as: Select the correct answer.

- A. Simple Object Access Protocol
- B. Service-Oriented Access Protocol
- C. Service Object Access Parameters
- D. Simple Object Acknowledgment Protocol

Correct Answer: A

QUESTION 6

Which of the following statements make sense? SELECT ALL THAT APPLY

- A. I have 3 SOAP-based Web services, each with its own individual service contract.
- B. I have 3 REST services, all of which share the same uniform contract.
- C. I have 3 SOAP-based Web services, each with its own uniform contract.
- D. I have 3 REST services, each of which is designed to be accessed via the same set of HTTP methods.

Correct Answer: ABD

QUESTION 7

Which of the following statements does not make sense? Select the correct answer.

- A. I built 3 SOAP-based Web services, each of which has its own published WSDL definition. 2 of the WSDL definitions share the same XML schema.
- B. I built 3 XML schemas, two of which are being shared by the same WSDL definition.
- C. I built 3 WSDL definitions and 3 XML schemas. Each WSDL definition is associated with its own XML schema.
- D. All of the above statements make sense.

Correct Answer: D

QUESTION 8

Which of the following technologies are fundamental to REST service design? SELECT ALL THAT APPLY

- A. HTTP
- B. WSDL
- C. MEP
- D. RPC

Correct Answer: A

QUESTION 9

Which of the following statements is true? Select the correct answer.

- A. An initial sender is at the beginning of the message path, whereas the service consumer is at the end of the message path.
- B. An intermediary service transitions through the initial sender role when it invokes another service provider.
- C. An initial sender is the service consumer at the beginning of the message path, whereas the ultimate receiver is the service provider at the end of the message path.
- D. An initial sender is not related to the message path but is instead a part of hybrid service component composition sequences.

Correct Answer: C

QUESTION 10

Which of the following are valid HTTP methods? SELECT ALL THAT APPLY

- A. Get
- B. Upload
- C. Put
- D. Delete

Correct Answer: ACD

QUESTION 11

Which of the following statements makes sense? Select the correct answer.

- A. I created a WS-BPEL process definition that composes 6 SOAP-based Web services, 2 of which also invoke other SOAP-based Web Services.
- B. I created a WS-BPEL process definition that establishes industry standard routing-related SOAP headers capable of routing six messages.
- C. I created a WS-BPEL process definition that establishes an industry standard framework for issuing positive and negative acknowledgements.
- D. None of these statements make sense.

Correct Answer: ABD

QUESTION 12

Which of the following exist as XML documents? SELECT ALL THAT APPLY

- A. WSDL definition
- B. XSLT stylesheet
- C. XML schema
- D. WS-Policy definition

Correct Answer: ABCD

QUESTION 13

Which of the following statements makes sense? Select the correct answer.

- A. I designed a unique XML schema for each of my REST services so that the HTTP methods used by these services are consistently named.
- B. My REST services are limited to the use of the GET HTTP method because only one XML schema was designed for all of them. In order to support additional HTTP methods, additional XML schemas will need to be designed due to the inherent dependency HTTP has on the XML Schema Definition Language.
- C. I designed my REST services to share the same XML schema.
- D. XML schemas cannot be used by REST services.

Correct Answer: C

QUESTION 14

Which of the following statements is true? Select the correct answer.

- A. REST services primarily rely on the use of SOAP headers to exchange message metadata.
- B. REST services primarily rely on the use of JMS headers to exchange message metadata.

- C. REST services primarily rely on the use of HTTP headers to exchange message metadata.
- D. REST services do not exchange messages with headers.

Correct Answer: C

QUESTION 15

Which of the following technologies has a namespace pre-defined by an industry standards organization? Select the correct answer.

- A. WS-Addressing
- B. REST
- C. Web 2.0
- D. Because all Web-based technologies are required to have namespaces, all of the above technologies have pre-defined namespaces.

Correct Answer: A
