F. Admin1, Admin2, and Admin3

Correct Answer: E

Explanation:

Permissions for disposition

*

 Admin3: To successfully access the Disposition tab in the Microsoft Purview compliance portal, users must have the Disposition Management role. From December 2020, this role is now included in the Records Management default role

group.

Note:

By default, a global admin isn\\'t granted the Disposition Management role.

*

 Admin2

Compliance Administrator - Members can manage settings for device management, data loss prevention, reports, and preservation.

The RecordManagement role is included in default roles assigned to the Compliance Administrator role. Incorrect:

*

 Not Admin1

The disposition reviewers explicitly need the Disposition Management role. This is included in the Records Management rule group

QUESTION 2

You are evaluating the technical requirements for the DLP reports. Which user can currently view the DLP reports?

A. Admin4

B. Admin1

C. Admin5

D. Admin2

E. Admin3

Correct Answer: E

QUESTION 3

You need to create a retention policy to retain all the files from Microsoft Teams channel conversations and private chats. Which two locations should you select in the retention policy? Each correct answer presents part of the solution. (Choose two.) NOTE: Each correct selection is worth one point.

A. OneDrive accounts

B. Office 365 groups

C. Team channel messages

D. SharePoint sites

E. Team chats

F. Exchange email

Correct Answer: AD

QUESTION 4

You have a Microsoft 365 tenant that uses trainable classifiers.

You are creating a custom trainable classifier.

You collect 300 sample file types from various geographical locations to use as seed content. Some of the file samples are encrypted.

You organize the files into categories as shown in the following table.

Category	Type	Language	Encryption status
Category1	.docx	French	Not encrypted
Category2	.xlsx	English	Encrypted
Category3	.pptx	German	Encrypted
Category4	.docx	English	Not encrypted
Category5	.mht	English	Not encrypted
Category6	.htm	English	Not encrypted

Which file categories can be used as seed content?

A. Category2, Category3, and Category5 only

B. Category1 and Category3 only

C. Category4 and Category6 only

D. Category4 and Category5 only

Correct Answer: C

Reference: https://docs.microsoft.com/en-us/microsoft-365/compliance/classifier-get-started-with?view=o365- worldwide https://docs.microsoft.com/en-us/sharepoint/technical-reference/default-crawled-file-name-extensions-and-parsed-file-types

QUESTION 5

HOTSPOT

Your company has offices in 30 countries.

The company has a Microsoft 365 E5 subscription that uses Microsoft SharePoint Online.

You create SharePoint sites for each department and country. The sites are named by using a naming convention of [Department]-[Country], for example, Sales-France.

You need to prevent files stored on the sites of the sales department from being deleted permanently for five years. The solution must meet the following requirements:

Only affect the files on the sales department sites.

Minimize administrative effort.

What should you include in the solution? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

To prevent the file deletion, use:	▼
	An auto-labeling retention policy
	A records management file plan
	A retention policy
	An auto-labeling retention policy

Restrict the solution to the sales department sites by using:	▼
	A sensitive info type
	A static scope
	An adaptive scope

Correct Answer:

To prevent the file deletion, use:

An auto-labeling retention policy
A records management file plan
A retention policy
An auto-labeling retention policy

Restrict the solution to the sales department sites by using:

A sensitive info type
A static scope
An adaptive scope

Explanation:

Box 1: A retention policy

You can very efficiently apply a single policy to multiple locations, or to specific locations or users.

Note: Retention policies can be applied to the following locations:

Exchange email

SharePoint site

OneDrive accounts

Microsoft 365 Groups

Skype for Business

Exchange public folders

Teams channel messages

Teams chats

Teams private channel messages

Yammer community messages

Yammer user messages

* Incorrect:

Auto-Label Retention Policy are based on Sensitivity Labels and are used to mark documents and files as containing important information.

Box 2: A static scope A static scope doesn\\'t use queries and is limited in configuration in that it can apply to all instances for a specified location, or use inclusion and exclusions for specific instances for that location. These three

![Pass2Lead](https://Pass2Lead.com)
choices are sometimes referred to as "org-wide", "includes", and "excludes" respectively.

Incorrect:

* Adaptive scope An adaptive scope uses a query that you specify, so the membership isn\\'t static but dynamic by running daily against the attributes or properties that you specify for the selected locations. You can use multiple adaptive scopes with a single policy.

QUESTION 6

HOTSPOT

You have a Microsoft 365 E5 tenant that contains three groups named Group1, Group2, and Group3.

You have the users shown in the following table.

Name	Member of
User1	Group1
User2	Group1, Group3
User3	Group2, Group3

You have the sensitivity labels shown in the following exhibit.

![Pass2Lead](https://Pass2Lead.com)
+ Create a label   ⊟ Publish labels   ↻ Refresh

Name		Order
General	⋮	0 – lowest
⌄ Confidential	⋮	1
Low	⋮	2
Medium	⋮	3
High	⋮	4
⌄ Top Secret	⋮	5
Low	⋮	6
Medium	⋮	7
High	⋮	8 – highest

You have the label policies shown in the following table.

![Pass2Lead](https://Pass2Lead.com)
Name	Labels to publish	Group	Apply this default label to documents
Policy1	Confidential Confidential – Low Confidential – Medium Confidential – High	Group1	Confidential
Policy2	All labels	Group2	Confidential – Medium
Policy3	Confidential Confidential – Low Confidential – Medium Confidential – High Top Secret	Group3	Top Secret

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Statements	Yes	No
The Confidential label will be applied to all the documents created by User1.	○	○
User2 can apply the General label to all the documents created by User2.	○	○
User3 can change the label applied to a document created by User1.	○	○

Correct Answer:

Statements	Yes	No
The Confidential label will be applied to all the documents created by User1.	○	●
User2 can apply the General label to all the documents created by User2.	○	●
User3 can change the label applied to a document created by User1.	●	○

QUESTION 7

You plan to implement Microsoft Office 365 Advanced Message Encryption.

You need to ensure that encrypted email sent to external recipients expires after seven days.

![Pass2Lead](https://Pass2Lead.com)
What should you create first?

A. a custom branding template

B. a remote domain in Microsoft Exchange

C. a mail flow rule

D. an X.509 version 3 certificate

E. a connector in Microsoft Exchange

Correct Answer: A

Explanation:

You can only set expiration dates for emails to external recipients.

With Microsoft Purview Advanced Message Encryption, anytime you apply custom branding, the Office 365 applies the wrapper to email that fits the mail flow rule to which you apply the template. In addition, you can only use expiration if you

use custom branding.

Note: Create a custom branding template to force mail expiration by using PowerShell

Connect to Exchange Online PowerShell with an account that has global administrator permissions in your organization.

Run the New-OMEConfiguration cmdlet. PowerShell New-OMEConfiguration -Identity "Expire in 7 days" -ExternalMailExpiryInDays 7

Where:

Identity is the name of the custom template.

ExternalMailExpiryInDays identifies the number of days that recipients can keep mail before it expires. You can use any value between 1

QUESTION 8

You have a Microsoft 365 E5 subscription.

You need to identify personal data stored in the subscription and control the transfer of personal data between users and groups.

Which type of license should you acquire?

A. Microsoft Purview Audit (Premium)

B. Priva Privacy Risk Management

C. Microsoft 365 E5 Compliance

D. Priva Subject Rights Requests

![Pass2Lead](https://Pass2Lead.com)
Correct Answer: B

QUESTION 9

Your company has a Microsoft 365 tenant.

The company performs annual employee assessments.

The assessment results are recorded in a document named Assessment I cmplatc.docx that is created by using Microsoft Word template.

Copies of the employee assessments are sent to employees and their managers.

The assessment copies are stored in mailboxes, Microsoft SharePoint Online sites, and OneDrive for Business folders. A copy of each assessment is also stored in a SharePoint Online folder named Assessments.

You need to create a data loss prevention (DLP) policy that prevents the employee assessments from being emailed to external users.

You will use a document fingerprint to identify the assessment documents.

What should you include in the solution?

A. Create a fingerprint of 100 sample documents in the Assessments folder.

B. Create a sensitive info type that uses Exact Data Match (EDM).

C. Import 100 sample documents from the Assessments folder to a seed folder.

D. Create a fingerprint of AssessmentTemplate.docx.

Correct Answer: D

Reference: https://docs.microsoft.com/en-us/microsoft-365/compliance/document-fingerprinting?view=o365-worldwide

---

QUESTION 10

You have a Microsoft 365 E5 tenant that uses a domain named contoso.com.

A user named User1 sends link-based, branded emails that are encrypted by using Microsoft Office 365 Advanced Message Encryption to the recipients shown in the following table.

![Pass2Lead](https://Pass2Lead.com)
Name	Email address
Recipient1	Recipient1@contoso.com
Recipient2	Recipient2@fabrikam.onmicrosoft.com
Recipient3	Recipient3@outlook.com
Recipient4	Recipient4@gmail.com

For which recipients can User1 revoke the emails?

A. Recipient4 only

B. Recipient1 only

C. Recipient1, Recipient2, Recipient3, and Recipient4

D. Recipient3 and Recipient4 only

E. Recipient1 and Recipient2 only

Correct Answer: A

Reference: https://docs.microsoft.com/en-us/microsoft-365/compliance/revoke-ome-encrypted-mail?view=o365-worldwide

---

QUESTION 11

You have a Microsoft OneDrive for Business folder that contains the files shown in the following table.

Type	Number of files
.jpg	50
.docx	300
.txt	50
.zip	20

In Microsoft Cloud App Security, you create a file policy to automatically apply a classification. What is the effect of applying the policy?

A. The policy will apply to only the .docx and .txt files. The policy will classify the files within 24 hours.

B. The policy will apply to all the files. The policy will classify only 100 files daily.

C. The policy will apply to only the .docx files. The policy will classify only 100 files daily.

D. The policy will apply to only the .docx and .txt files. The policy will classify the files immediately.

Correct Answer: C

Reference: https://docs.microsoft.com/en-us/cloud-app-security/azip-integration

QUESTION 12

You implement Microsoft 365 Endpoint data loss prevention (Endpoint DLP).

You have computers that run Windows 10 and have Microsoft 365 Apps installed. The computers are joined to Azure Active Directory (Azure AD).

You need to ensure that Endpoint DLP policies can protect content on the computers.

Solution: You onboard the computers to Microsoft Defender fur Endpoint.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

QUESTION 13

HOTSPOT

You have a Microsoft 365 E5 tenant.

You need to create a custom trainable classifier that will detect product order forms. The solution must use the principle of least privilege.

What should you do first? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

![Pass2Lead](https://Pass2Lead.com)
Action to perform: ▼

| Create an Exact Data Match (EDM) schema |
| Import a data loss prevention (DLP) rule package. |
| Start the opt-in process |

To perform the action, assign the role of: ▼

| Compliance Administrator |
| Global Administrator |
| Security Administrator |

Correct Answer:

Action to perform: ▼

| Create an Exact Data Match (EDM) schema |
| Import a data loss prevention (DLP) rule package. |
| Start the opt-in process |

To perform the action, assign the role of: ▼

| Compliance Administrator |
| Global Administrator |
| Security Administrator |

Explanation:

Box 1: Start the opt-in process

Prepare for a custom trainable classifier

It\\'s helpful to understand what\\'s involved in creating a custom trainable classifier before you dive in.

Timeline

This timeline reflects a sample deployment of trainable classifiers.

Opt-in is required the first time for trainable classifiers. It takes twelve days for Microsoft 365 to complete a baseline evaluation of your organizations content. Contact your global administrator to kick off the opt-in process.

Box 2: Compliance Administrator

Compliance Administrator role is required to train a classifier.

![Pass2Lead Logo](https://Pass2Lead.com)
QUESTION 14

HOTSPOT

You have a Microsoft 365 E5 subscription that contains the devices shown in the following table.

Name	Platform	Microsoft Intune
Device1	Windows 11	Not enrolled
Device2	macOS	Enrolled

You need to onboard the devices to Microsoft Purview. The solution must ensure that you can apply Endpoint data loss prevention (Endpoint DLP) policies to the devices. What can you use to onboard each device? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Device1:

- The Company Portal app only
- Microsoft Endpoint Manager only
- A local script and Group Policy only
- The Company Portal app and Microsoft Endpoint Manager only
- **A local script, Group Policy, and Microsoft Endpoint Manager** *(selected)*

Device2:

- The Company Portal app only
- **A local script only** *(selected)*
- Microsoft Endpoint Manager only
- A local script and Microsoft Endpoint Manager only
- The Company Portal app and Microsoft Endpoint Manager only
- The Company Portal app, a local script, and Microsoft Endpoint Manager

Correct Answer:

Answer Area

Device1: [▼]

The Company Portal app only
Microsoft Endpoint Manager only
A local script and Group Policy only
The Company Portal app and Microsoft Endpoint Manager only
A local script, Group Policy, and Microsoft Endpoint Manager

Device2: [▼]

The Company Portal app only
A local script only
Microsoft Endpoint Manager only
A local script and Microsoft Endpoint Manager only
The Company Portal app and Microsoft Endpoint Manager only
The Company Portal app, a local script, and Microsoft Endpoint Manager
