QUESTION 1

How many alarm types does Veeam ONE Business View offer?

A. The number of alarm types can be configured manually

B. Zero: Alarms are not available in Veeam ONE Business View

C. Two: Error and Warning

D. Three: Error, Warning and Information

Correct Answer: B

QUESTION 2

A company has the following requirements:

Mission-critical VMs: hourly replication to disaster recovery site, daily backups of these VMs should be available at the disaster recovery site when required, the mission critical applications need to be available within 20 minutes.

Business-important VMs: daily backups should be stored at the disaster recovery site. When required, the business-important applications need to be available within four hours.

Define the RPO and RTO for the company\\'s disaster recovery site.

A. Mission-critical VMs: RPO = 60 minutes, RTO = one hour; business-important VMs: RPO = 60 minutes, RTO = four hours

B. Mission-critical VMs: RPO = 24 hours, RTO = 20 minutes; business-important VMs: RPO = 24 hours, RTO = four hours

C. Mission-critical VMs: RPO = 60 minutes, RTO = 20 minutes; business-important VMs: RPO = 24 hours, RTO = four hours

D. Mission-critical VMs: RPO = 24 hours, RTO = four hours; business-important VMs: RPO = 24 hours, RTO = four hours

Correct Answer: C

QUESTION 3

When you back up regular or standalone VMs in vCloud Director, which of the following is captured and stored in Veeam\\'s Backup and Replication backup file? (Choose three.)

A. vApp metadata

B. VM disk content

C. Raw device mapping

D. In-guest iSCSI disk

E. VM metadata

F. Linked clone VM\\'s prior to vCenter 6.5

Correct Answer: ABE

Reference: https://helpcenter.veeam.com/docs/backup/vsphere/vcloud_regular_vm_restore.html?ver=100

QUESTION 4

Which of these functionalities rely on the guest OS file system indexing?

A. Multi-OS file-level restore

B. Application-aware processing

C. Search within Veeam Backup Enterprise Manager

D. Zeroing Out Dirty Blocks

Correct Answer: B

QUESTION 5

Which EMC SAN storage systems are compatible with the Backup from SAN Snapshot feature in Veeam Backup and Replication? (choose the 2 appropriate options)

A. EMC VNXe

B. EMC ISILON

C. EMC VNX

D. EMC Data Domain

Correct Answer: AC

QUESTION 6

Which of the following Veeam Backup and Replication jobs can use integration with secondary arrays as a data source?

A. Backup

B. VM copy

C. Replication

D. Tape backup

Correct Answer: A

QUESTION 7

Veeam ONE has been installed and configured. The infrastructure contains five Veeam Backup and Replication servers.

The administrator needs to check the remaining capacity on each of the backup repository servers. Where can they see this information?

A. Under Infrastructure View, look up the Veeam Backup and Replication servers to see the guest disk space.

B. Under Data Protection View, look up the backup repository servers to see the remaining capacity.

C. Under Business View, look up the backup repository servers to see the remaining capacity.

D. Under Infrastructure View, look up the backup repository servers to see the guest disk space.

Correct Answer: B

Explanation: According to the Veeam ONE Reporting Guide1, you can use the Capacity Planning for Backup Repositories report to analyze configuration and space usage on backup repositories and to forecast how many days remain before

the repository reaches its full capacity.

You can also use the Backup Repository Summary dashboard2 or the Backup Repositories Overview dashboard3 to see details of performance, capacity and archive tiers for backup repositories.

QUESTION 8

Which of the following is NOT a benefit of using Veeam Backup and Replication and EMC Data Domain with DD Boost integration compared to no DD Boost integration?
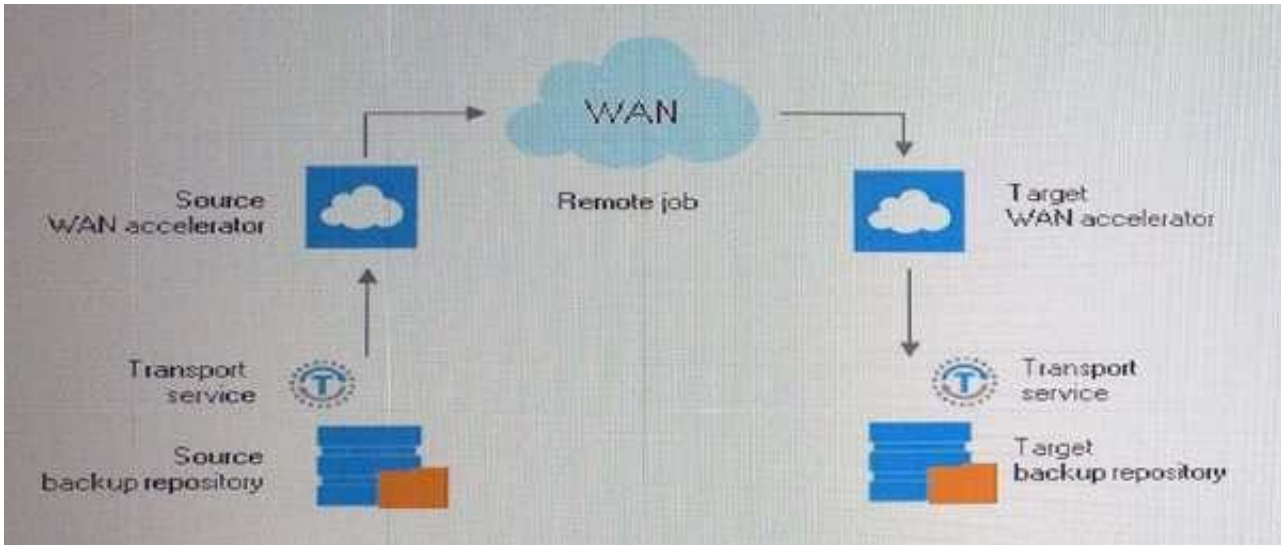

A. Lower RTO

B. Fibre Channel support

C. Lower network usage

D. Enhanced synthetic full backup creation

Correct Answer: A

QUESTION 9

In the VeeamWAN folder created by the Veeam Backup and Replication WAN accelerator, select the correct type of

![Pass2Lead](https://Pass2Lead.com)
source and target data stored in the VeeamWAN folder:

Hot Area:

Correct Answer:

Answer Area

Source

| Global cache data |
| Digest Files |

Target

| Global cache data |
| Digest Files |

QUESTION 10

Which of the following built-in predefined tests can be performed to verify that a VM replica started in a Virtual Lab? (Choose three.)

A. Memory test

B. Ping test

C. Application test

D. CRC check

E. Heartbeat test

F. Hard drive test

Correct Answer: BCE

Reference: https://helpcenter.veeam.com/docs/backup/hyperv/surebackup_tests.html?ver=95

QUESTION 11

A backup administrator needs to restore two data drives to a VM where the operating system remains intact. The target machine must remain powered on. What recovery option is most appropriate to perform this operation?

A. Instant VM Recovery

B. Instant disk recovery

C. Restore entire VM

D. Restore VM files

Correct Answer: B

Reference: https://helpcenter.veeam.com/docs/backup/vsphere/instant_recovery.html?ver=100

QUESTION 12

Since the last remote replica from backup job, the source backup job ran three times, making 3 new restore points. Now the replica from backup job is run again. How many restore points will this replica from backup job create?

A. None

B. One

C. Three

D. Four

E. this is not a supported configuration

Correct Answer: B

QUESTION 13

Under what circumstance should the Preferred Networks settings be altered?

A. When it is necessary to limit the maximum throughput of traffic going from source to target data mover services

B. When it is required to keep production storage availability from being impacted by the load from backup tasks

C. When the network capacity is not sufficient to support multiple data transfer connections

D. When the backup traffic must be routed to a specific network

Correct Answer: D

Reference https://helpcenter.veeam.com/docs/backup/hyperv/select_backup_network.html?ver=95

QUESTION 14

A virtual machine in your environment has been hit by a virus. You need to restore the virtual machine as fast as possible. At the same time, you need to make sure that any dormant virus on the backed up virtual machine is detected. What restore method should you use when recovering to a new location?

A. Instant VM Recovery with "staged restore"

B. Instant VM Recovery with "secure restore"

C. SureBackup

D. Virtual disk restore

Correct Answer: B

Reference: https://helpcenter.veeam.com/docs/backup/em/em_disk_restore.html?ver=100

QUESTION 15

Which one of these functionalities relies on the guest OS file system indexing?

A. Zeroing out dirty blocks

B. Searching within Veeam Backup Enterprise Manager

C. Multi-OS file-level restore

D. Application-aware processing

Correct Answer: B
